

PHARMACOVIGILANCE OF VETERINARY MEDICINAL PRODUCTS
Controlled Lists of Terms
VICH GL 30
22 June 2010

I. INTRODUCTION

To assess the safety and efficacy of veterinary medicinal products, the use of controlled lists of terms is important in order to assure consistency, as well as to allow comparison between products and across product classes. The data fields that require controlled lists of terms have been identified in VICH GL42 "Data Elements for Submission of Adverse Event Reports".

Regulatory authorities and industry have partnered in the development of the lists and a maintenance procedure (through the ad-hoc Controlled Lists of Terms Implementation Task Force from June 2008 to February 2009). The lists have been developed by making use of existing lists by regulatory authorities and industry.

The controlled lists of terms provide a level of discrimination sufficient to record, search and categorize for trending. The lists have standardized groupings of terms, of a manageable size but with sufficient detail to allow standardised input and analysis. The controlled lists are made accessible via the VICH Secretariat Website (<http://www.vichsec.org/>) and RA websites.

For the data fields that use controlled lists of terms, user systems can, to facilitate reporting or inputting, use a subset of terms listed in GL30 that are considered relevant to the region and to the products involved. However, when receiving reports electronically, that are compliant with the relevant VICH guidelines, all systems must be capable of importing and storing the full report, including all standard terms and codes, without loss of information.

II. SCOPE

This document provides guidance on the controlled lists of terms required to complete the controlled data fields as identified in GL 42. This document includes also the maintenance procedure to keep the lists of terms up to date.

III. SPECIFICATIONS

III.1. List of Terms (see Annex A)

The lists will be updated in line with the maintenance procedure described in section III.2.

The controlled lists of terms as referred to in the data elements in GL 42 must be used for submission of adverse event reports. The lists are:

- a. Reporter Categories (GL42 A.3.1.1 and A.3.2.1)
- b. RA (Regulatory Authorities) Identifier Codes (GL42 A.4.1)
- c. Type of Submission (GL42 A.4.4.1)
- d. Type of Information in Report (GL42 A.4.4.3)

e. Attending Veterinarian's Health Status Assessment (GL42 B.1.2.1)

f. Species. (GL42 B.1.3)

The species list contains the predominant species or general collection of species terms that are being observed in adverse event reports by regulators and industry. The list accommodates data entry of commonly known terms and therefore does not follow taxonomy.

g. Breeds (GL42 B.1.4)

- The breed list contains commonly reported subspecies/breeds for the species identified in the Species list but also includes the special circumstances of:
 - “other”: to allow submission data for breeds that have not yet been included (e.g. “other rodent (other)”).
 - “unspecified”: to allow identification of breed if the “general” breed could be identified but not the specific one (e.g. “Pointing dog – German (unspecified)” if it was not identified whether it was a shorthair or wire haired German pointing dog).
 - “mixed”: to allow the submission of cases that include a mix of different breeds for which it was not possible and/or not useful to identify the specific breeds of the group, e.g., “Mixed (cattle)”.

h. Gender (GL42 B.1.5)

i. Reproductive Status (GL42 B.1.6)

j. Female Physiological Status (GL42 B.1.7)

k. Precision Categories (GL42 B.1.8.1 and B.1.9.1)

l. RA Assessment (GL42 B.2.1.6)

m. Route of Exposure (GL42 B.2.1.7)

The VICH list that has been developed by the Controlled Lists of Terms Implementation Task Force, is a comprehensive list that includes routes of exposure that are specific to veterinary medicinal products. At this stage however, in an interim phase, it is agreed to use a less detailed list that is in operation by the FDA.

This interim phase should end when the relevant International Route of Exposure list becomes available that is being developed in the frame of “*ISO prEN 11239 Health informatics — Identification of Medicinal Products — Data elements and structures to uniquely identify pharmaceutical dose forms, units of presentation and routes of administration*”. When the relevant ISO list contains the specific “veterinary” routes of exposure that are included in the VICH Route of exposure list, the Maintenance Committee (see III.2.2) should verify and decide to replace the interim FDA list by the relevant ISO list.

n. Units of Presentation (GL42 B.2.1.7.1.1.1 and B.2.2.1.1.1)

o. Units of Measurement (GL42 B.1.9.2.1, B.1.9.3.1, B.2.1.7.1.1.1, B.2.1.7.1.2.1.1, B.2.2.1.1.1 and B.3.5.1.1)

p. Dosage Forms (GL42 B.2.2.2)

The VICH list that has been developed by the Controlled Lists of Terms Implementation Task Force, is a comprehensive list that includes dosage forms that are specific to veterinary medicinal products. At this stage however, in an interim phase, it is agreed to use a less detailed list that is in operation by the FDA.

This interim phase should end when the relevant International dosage form list becomes available that is being developed in the frame of “*ISO prEN 11239 Health informatics — Identification of Medicinal Products — Data elements and structures to uniquely identify pharmaceutical dose forms, units of presentation and routes of administration*”. When the relevant ISO list contains the specific “veterinary” dosage forms that are included in the VICH Dosage forms list, the Maintenance Committee (see III.2.2) should verify and decide to replace the interim FDA list by the relevant ISO list.

q. Administrators of VMP (GL42 B.2.4)

r. Off-Label Use Coding System (GL42 B.2.5.1)

The explanation for off-label use and its corresponding codes are obtained by using a coding system that is based on sequentially answering a maximum of 8 questions related to the approved conditions for target species, route of administration, dose level, treatment regimen, indications, storage conditions, expiration and “any other”. The file presents the possible outcomes to the questions and the corresponding codes. Code 120 for “various” should be used when an adverse event report contains a group of animals with different out of label conditions observed for different animals in the group.

s. VeDDRA Terms (GL42 B.3.2)

VeDDRA terminology for animal and human adverse events is the clinical dictionary to describe adverse clinical manifestations (GL 42). The list as well as the full explanation and a Guidance Notes on the Use of VeDDRA Terminology for Reporting adverse events in Animals can be downloaded from the EMA Website: <http://www.ema.europa.eu/>.

t. Exposure and Onset Time (GL42 B.3.4)

u. Attending Veterinarian’s Causality Assessment (GL42 B.5.1)

v. Document Types (GL42 B.7.1.1)

w. Dose Denominator Qualifiers (GL42 B.2.1.7.1.2.1)

x. Accuracy of No. of Animals (GL42 B.3.2.1.1)

III.2. Maintenance

III.2.1. General Requirements

The lists are periodically reviewed. The revisions of the lists do not require the revision of GL24, GL30, GL35 and GL42.

The procedure for the yearly maintenance of VeDDRA is published on the EMA Website (<http://www.ema.europa.eu/>). The representatives of all VICH regions are formally invited to participate in the yearly meeting for the revision of VeDDRA.

III.2.2 Maintenance Committee

The maintenance of the controlled List of Terms will take place annually in a meeting. In general, this meeting should take place by teleconference, web-conference and/or e-mail exchange. Face-to-face meetings may be considered if needed. Ad-hoc meetings may be considered in addition, if urgent matters arise. The preparatory work will take place for each individual list by the lead regions (see Annex B). Implementation of the changes to the lists must be done within realistic time frames.

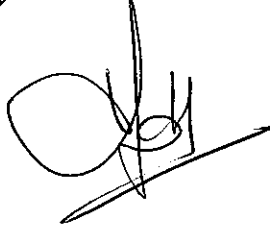

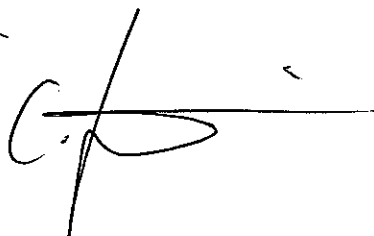

The meeting members will discuss and conclude by consensus on the proposals to revise the lists.

Revisions will be maintained consistent at least with the following principles,

- revisions will be made only when justified by rational scientific need,
- revisions will be made with strict version control and backward compatibility,
- revisions will be consistent with technical requirements.

The revised lists will replace the Annexed lists of GL30 and will be submitted for publication on the VICH Website within 30 days of finalisation.

TYPE OF SUBMISSION GL42 A.4.4.1

VICH CODE	VICH TERM	VICH DEFINITION
C68624	EXPEDITED	A report as defined by VICH GL24 - Management of Adverse Event Reports
C53578	PERIODIC	A report as defined by VICH GL24 - Management of Adverse Event Reports
C53579	FOLLOW-UP	A report as defined by legislation, regulations or guidance documents
C68625	NULLIFICATION	A report as defined by legislation, regulations or guidance documents
C17649	OTHER	The actual value is not an element in the value domain of a variable (e.g., concept not provided by required code system).

TYPE OF INFORMATION IN REPORT GL42 A.4.4.3		
VICH CODE	VICH TERM	VICH DEFINITION
C82461	SAFETY ISSUE	Any observation in animals or humans, whether or not considered to be product related that is unfavorable and unintended, excluding suspected lack of expected effectiveness and that occurs after any use of the veterinary medicinal product(s) (off-label and on-label uses). (As defined by VICH GL24 - Management of Adverse Event Reports)
C82456	LACK OF EXPECTED EFFECTIVENESS	An adverse event in animals that only involves suspected lack of expected effectiveness according to approved labelling after any use of the veterinary medicinal product(s). (As defined by VICH GL24 - Management of Adverse Event Reports)
C82452	BOTH SAFETY AND LACK OF EXPECTED EFFECTIVENESS	An adverse event in animals that involves both safety issue(s) and suspected lack of expected effectiveness after any use of the veterinary medicinal product(s).
C17649	OTHER	The actual value is not an element in the value domain of a variable (e.g., concept not provided by required code system).

ATTENDING VETERINARIAN'S ASSESSMENT OF ANIMAL HEALTH STATUS PRIOR TO EXPOSURE TO VMP GL42**B.1.2.1**

VICH CODE	VICH TERM	VICH Definition
C82488	EXCELLENT	The condition as defined "excellent" by the attending veterinarian.
C64975	GOOD	The condition as defined "good" by the attending veterinarian.
C82489	FAIR	The condition as defined "fair" by the attending veterinarian.
C77959	POOR	The condition as defined "poor" by the attending veterinarian.
C25467	CRITICAL	The condition as defined "critical" by the attending veterinarian.
C17998	UNKNOWN	Not known, not observed, not recorded, or refused
C82478	NO ATTENDING VETERINARIAN	There was no attending veterinarian for this adverse event.

Cattle	BOV86	Cholistani
Cattle	BOV87	Corriente
Cattle	BOV88	Costeño con Cuernos also known as Andaluz, CCC, Cornigero de la costa, Sinuano de cuernos
Cattle	BOV89	Crossbred Bovine/Cattle
Cattle	BOV90	Dajal
Cattle	BOV91	Damascus also known as Aleppo, Damascene, Halabi, Kilis (Turkey), Shami, Shamia
Cattle	BOV92	Damietta also known as Domiatta, Domiatti, Domyati, Dumiat, Dumyati
Cattle	BOV93	Dangis
Cattle	BOV94	Danish Friesian
Cattle	BOV95	Danish Jersey
Cattle	BOV96	Danish Red
Cattle	BOV97	Danish Red and White
Cattle	BOV98	Deoni also known as Dongari

Cattle	BOV99	Devon - Milking
Cattle	BOV100	Devon (other)
Cattle	BOV101	Devon - South
Cattle	BOV102	Dexter
Cattle	BOV103	Dhanni
Cattle	BOV104	Dølafe - Maybe extinct
Cattle	BOV105	Droughtmaster
Cattle	BOV106	Dulong
Cattle	BOV107	Dutch Belted (Lakenvelder)
Cattle	BOV108	Dutch Friesian also known as Dutch Black Pied, Zwartbont (Dutch), Black-and-white Holland, Black Pied Dutch, Dutch Lowland
Cattle	BOV109	East Anatolian Red Cattle also known as Dogu Anadolu Kirmizisi
Cattle	BOV110	Enderby Island
Cattle	BOV111	English Longhorn also known as Longhorn - Historical Synonyms: Dishley, Lancashire, Leicestershire, Warwickshire
Cattle	BOV112	Estonian Red
Cattle	BOV113	Evolène
Cattle	BOV114	Fighting Bull also known as toro de lidia, toro lidiado, ganado bravo, Touro de Lide
Cattle	BOV115	Finnish also known as Suomenkarja, Suomalainen Karja, Finsk (Swedish), Finncattle - Varieties: East Finnish (red and white), North Finnish (white) and West Finnish (red).
Cattle	BOV116	Fjall also known as Swedish Mountain, Fjällras, Swedish Highland
Cattle	BOV117	Florida Cracker also known as Piney Woods, Florida Scrub or Florida Native Cattle
Cattle	BOV118	Galega/Minhota
Cattle	BOV119	Galician Blond
Cattle	BOV120	Galloway
Cattle	BOV121	Gaolao

Sheep	SHE310	Turkgeldi
Sheep	SHE311	Tyrol Mountain also known as Bergschaf, Tirolese della Montagna, Bergschaf, Carinthian Mountain, Tiroler, White Mountain, Weisses Bergschaf, Gebirgsschaf, Pecora bianca delle Montagne
Sheep	SHE312	Uda also known as Oudah bicolore (French), Bali-Bali, Bororo, Fellata, Foulbe, Houda, Louda, North Nigerian Fulani, Ouda, Pied
Sheep	SHE313	Ujumqin
Sheep	SHE314	Ushant also known as Ouessant, Ouessantin (French), Breton Dwarf
Sheep	SHE315	Valais Blacknose also known as Wallis Blacknose, Walliser Schwarznaseschaf, Blacknosed Swiss, Visp, Visperschaf.
Sheep	SHE316	Van Rooy also known as Van Rooy-Persie (Afrik.), Van Rooy White Persian, White Persian

Sheep	SHE317	Vasca
Sheep	SHE318	Vendeen
Sheep	SHE319	Walachenschaf also known as Moravian Zackelschaf, Voloshian, Valakhs kaya, Voloshskaya, Valachian, Valahian, Valakhian, Volosh, Walachian, Wallachian achel, Woloschian
Sheep	SHE320	Wallis Country Sheep (Roux du Valais)
Sheep	SHE321	Waziri
Sheep	SHE322	Weisse Hornlose Heidschnucke also known as Moorschnucke, White Hornless Heath Sheep
Sheep	SHE323	Welsh Hill Speckled Face
Sheep	SHE324	Welsh Mountain
Sheep	SHE325	Welsh Mountain Badger Face also known as Badger Faced Welsh Mountain, Defaid Idloes, Welsh Badger-faced
Sheep	SHE326	Wensleydale
Sheep	SHE327	West African Dwarf also known as Cameroons Dwarf, Djallonké, Forest-type, Fouta Djallon, Futa Jallon, Guinean, Kirdi, Kirdimi, Lakka, Nigerian Dwarf, Pagan, Savannah-type, Southern, West African Maned
Sheep	SHE328	White Horned Heath Sheep also known as Weiße Gehörnte Heidschnucke
Sheep	SHE329	White Karaman also known as Barazi, Barasi, Brazi, Brézi, Parasi, Garha, Agrah, Akrah, Gargha, Guerha, Karha, Salamali
Sheep	SHE330	Whiteface Dartmoor
Sheep	SHE331	Whitefaced Woodland also known as Penistone, Woodland Whiteface, Woodlands Horned
Sheep	SHE332	Wiltshire Horn
Sheep	SHE333	Xalda
Sheep	SHE334	Xaxi Ardia
Sheep	SHE335	Xinjiang Fine-wool
Sheep	SHE336	Yankasa also known as Hausa, White Fulani, Y'ankasa
Sheep	SHE337	Yemen White
Sheep	SHE338	Yemeni
Sheep	SHE339	Yiecheng
Sheep	SHE340	Yoroo
Sheep	SHE341	Yunnan Semifinewool
Sheep	SHE342	Zaghawa
Sheep	SHE343	Zagoria
Sheep	SHE344	Zaian
Sheep	SHE345	Zaire Long-legged
Sheep	SHE346	Zakynthos
Sheep	SHE347	Zakynthos also known as Zante
Sheep	SHE348	Zeeland Milk also known as Zeeuwse Melkschaap, Walcherse Melkschaap
Sheep	SHE349	Zel also known as Chiva, Iran Thin-tailed, Mazandarani, Persian Thin-tailed
Sheep	SHE350	Zelazna also known as Zeleznienska
Sheep	SHE351	Zemmour

Sheep	SHE352	Zeta Yellow also known as Zetska Zuja
Sheep	SHE353	Zlatusha also known as Zlatoucha
Sheep	SHE354	Zoulay also known as Berber à laine Zoulai, Mouton de montagne à laine Zoulai
Snake	SNA1	Anaconda
Snake	SNA2	Boa
Snake	SNA3	Cobra
Snake	SNA4	Grass Snake
Snake	SNA5	Snake (other)
Snake	SNA6	Python
Snake	SNA7	Rattlesnake
Snake	SNA8	Snake (unknown)
Snake	SNA9	Viper
Snake	SNA10	Viperine Snake
Turkey	TUR1	Black Turkey
Turkey	TUR2	Bourbon Turkey
Turkey	TUR3	Bronze Turkey
Turkey	TUR4	Mixed (Turkey)
Turkey	TUR5	Narragansett Turkey
Turkey	TUR6	Turkey (other)
Turkey	TUR7	Royal Palm Turkey
Turkey	TUR8	Slate Turkey
Turkey	TUR9	Turkey (unknown)
Turkey	TUR10	White Turkey

GENDER LIST GL42 B.1.5

VICH CODE	VICH TERM	VICH DEFINITION
C16576	FEMALE	Female Patient. An individual who belongs to the sex that normally produces ova. The term is used to indicate biological sex distinctions.
C20197	MALE	Male Patient. An individual who belongs to the sex that normally produces sperm. The term is used to indicate biological sex distinctions.
C25259	MIXED	Both male and female patients are included in a group.
C17998	UNKNOWN	Not known, not observed, not recorded, or refused

REPRODUCTIVE STATUS GL42 B.1.6

VICH CODE	VICH TERM	VICH DEFINITION
C62399	INTACT	The patient(s) is reproductively intact.
C54011	NEUTERED	The patient(s) is not reproductively intact.
C25259	MIXED	The group of patients contain both reproductively intact and neutered individuals.
C17998	UNKNOWN	Not known, not observed, not recorded, or refused

FEMALE PHYSIOLOGICAL STATUS GL42 B.1.7

VICH CODE	VICH TERM	VICH DEFINITION
PRL	PREGNANT LACTATING	Use for pregnant patient(s) that is lactating.
NPL	NONPREGNANT LACTATING	Use for nonpregnant patient(s) that is lactating.
PNL	PREGNANT NONLACTATING	Use for pregnant patient(s) that is nonlactating.
NPN	NONPREGNANT NONLACTATING	Use for nonpregnant patient(s) that is nonlactating.
MIX	MIXED	Use for a group of patients where many different female physiological statuses are involved in the case.
NA	NOT APPLICABLE	No proper value is applicable in this context (e.g., last menstrual period for a male.)
C17998	UNKNOWN	Not known, not observed, not recorded, or refused

PRECISION CATEGORIES FOR WEIGHT AND AGE GL42 B.1.8.1 and B.1.9.1

VICH CODE	VICH TERM	VICH DEFINITION
C44473	MEASURED	The value is measured with measuring device, e.g., scale, ruler, et cetera; or is known, e.g., age.
C25498	ESTIMATED	The value is a guess or approximated weight or age.
C17998	UNKNOWN	Not known, not observed, not recorded, or refused

B.2.1.6 REGULATORY AUTHORITY ASSESSMENT CATEGORIES		
VICH CODE	VICH TERM	VICH DEFINITION
C54154	Probable	The assessment of association is "probable" as defined within the regions.
C82490	Possible	The assessment of association is "possible" as defined within the regions.
C53257	Unlikely	The assessment of association is "unlikely" as defined within the regions.
C53269	Unclassified	The assessment of association is "unclassified" as defined within the regions.
C82477	No Assessment	The assessment of association is "no assessment" as defined within the regions.

PLEASE SEE VICH GL30 - Intermediately the FDA list is to be used (see m. Route of Exposure (FDA)), which is extracted from the D and E columns				
VICH codes	VICH GL30 route of exposure terms	DEFINITION	FDA Terms	FDA Codes
1	Auricular	Administration of a medicinal product to the ear.	AURICULAR (OTIC)	C38192
2	Beak dipping	Veterinary use only Administration of a veterinary medicinal product by dipping the beak of birds into an aqueous solution of the medicinal product.	ORAL	C38288
3	Buccal	Administration of a medicinal product directed toward the cheek, from within the mouth.	BUCCAL	C38193
4	Cutaneous	Administration of a medicinal product to the skin and/or cutaneous wounds and/or nails and/or hair in order to obtain a local effect.	CUTANEOUS	C38675
5	Dental	Administration of a medicinal product to and/or in the teeth or, on and/or around the nerves supplying the teeth.	DENTAL	C38197
6	Dipping	Veterinary use only Administration of a veterinary medicinal product by immersing the animal into a bath or plunge pool containing the medicinal product.	IMMERSION	C38304
7	Disinfectant	Exposure to a disinfectant (an antimicrobial agent capable of destroying pathogenic and potentially pathogenic microorganisms)	UNASSIGNED	C43002
8	Endocervica	Administration of a medicinal product to the cervix uteri.	ENDOCERVICAL	C38205
9	Endosinusal	Administration of a medicinal product to the sinuses to obtain a local effect.	ENDOSINUSIAL	C38206
10	Endotracheal	Administration of a medicinal product to the trachea and/or bronchiae by instillation (preparations for inhalation are excluded; see inhalation use).	ENDOTRACHEAL	C38208
11	Epidural	Injection of a medicinal product into the epidural space.	EPIDURAL	C38210
12	Extra-amniotic	Injection of a medicinal product between chorion and amnion.	EXTRA-AMNIOTIC	C38211
13	Foot-stab	Veterinary use only Administration of a veterinary medicinal product into the foot of birds.	PERCUTANEOUS	C38676
14	Gingival	Administration of a medicinal product to the gingivae.	INTRAGINGIVAL	C38247
15	Hemodialysis	Clearance of the blood by means of a semipermeable membrane.	HEMODIALYSIS	C38200
16	In drinking water/milk	Veterinary use only Administration of a veterinary medicinal product by incorporation into the animal drinking water, milk or milk replacer.	ORAL	C38288
17	In ovo	Veterinary use only Administration of a veterinary medicinal product through the shell into an embryonated egg.	IN OVO	C85518
18	In-feed	Veterinary use only Administration of a veterinary medicinal product by incorporation into the animal feed.	ORAL	C38288
19	Inhalation	Administration of a medicinal product to the respiratory system by inhalation to obtain a systemic or a local effect in the lower respiratory tract. Nasal use and endotracheopulmonary use are excluded	RESPIRATORY (INHALATION)	C38216
20	In-hive	Veterinary use only Administration of a veterinary medicinal product by placing it or sprinkling over a bee hive.	IN-BEE-HIVE	C85517
21	Intra-amniotic	Injection of a medicinal product into the amniotic cavity.	INTRA-AMNIOTIC	C38221
22	Intra-arterial	Injection of a medicinal product into an artery.	INTRA-ARTERIAL	C38222
23	Intra-articular	Injection of a medicinal product into a joint.	INTRA-ARTICULAR	C38223
24	Intrabursal	Injection of a medicinal product into bursae and tendons.	INTRABURSAL	C38226

25	Intracardiac	Injection of a medicinal product into the cardiac muscle and/or cardiac cavity.	INTRACARDIAC	C38227
26	Intracerebral	Administration of a medicinal product directly to the brain tissue.	INTRACEREBRAL	C38232
27	Intracervical	Injection of a medicinal product into the cervix uteri.	ENDOCERVICAL	C38205
28	Intracisternal	Administration of a medicinal product into the cisterne	INTRACISTERNAL	C38233
29	Intracorneal	Administration of a medicinal product into the cornea	INTRACORNEAL	C38234
30	Intracoronary	Injection of a medicinal product into the coronary artery.	INTRACORONARY	C38218
31	Intradermal	Injection of a medicinal product into the dermis.	INTRADERMAL	C38238
32	Intradiscal	Injection of a medicinal product into the nucleous pulposus of an intervertebral disc.	INTRADISCAL	C38239
33	Intrafollicular	Administration of a medicinal product into an ovarian follicle	INTRAFOLLICULAR	C85519
34	Intragastric	Administration of a medicinal product directly into the stomach	INTRAGASTRIC	C38246
35	Intrahepatic	Administration of a medicinal product directly into the liver	INTRAHEPATIC	C79140
36	Intralesional	Administration by injection or any other means of a medicinal product directly to a lesion.	INTRALESIONAL	C38250
37	Intralymphatic	Injection of a medicinal product into a lymphatic vessel.	INTRALYMPHATIC	C38252
38	Intramammary	Veterinary use only Administration of a veterinary medicinal product into the intramammary gland via the teat canal.	INTRAMAMMARY	C79137
39	Intramedullar (bone marrow)	Administration of a medicinal product into the bone marrow. Intrasternal use is excluded.	INTRAMEDULLARY	C38253
40	Intrameningeal	Administration of a medicinal product into the meninges	INTRAMENINGEAL	C38254
41	Intramuscular	Injection of a medicinal product into muscular tissue.	INTRAMUSCULAR	C28161
42	Intranasal	Administration of a medicinal product to the nose to obtain a systemic or local effect. Inhalation therapy intended for the lower respiratory tract is excluded; see inhalation use.	NASAL	C38284
43	Intraocular	Administration of a medicinal product into the eye. The term intraocular is only for use when a more specific term (for ex. intravitreal...) does not apply. Ocular use and subconjunctival use are excluded.	INTRAOCULAR	C38255
44	Intrapericardial	Injection of a medicinal product to the pericardium.	INTRAPERICARDIAL	C38257
45	Intraperitoneal	Injection of a medicinal product into the peritoneal cavity.	INTRAPERITONEAL	C38258
46	Intrapleural	Injection of a medicinal product into the pleural cavity.	INTRAPLEURAL	C38259
47	Intraruminal	Veterinary use only Administration of a veterinary medicinal product into the rumen.	INTRARUMINAL	C79139
48	Intrasternal	Injection of a medicinal product into the bone marrow of the sternum.	INTRASTERNAL	C64988
49	Intrasynovial	Administration of a medicinal product into the synovial cavity of the joint	INTRASYNOVIAL	C38264
50	Intratendinous	Administration of a medicinal product into the tendon	INTRATENDINOUS	C38265
51	Intratesticular	Administration of a medicinal product directly into the testis	INTRATESTICULAR	C38266
52	Intrathecal	Injection of a medicinal product through the dura to the subarachnoid cavity.	INTRATHECAL	C38267
53	Intrathoracic	Administration of a medicinal product directly into the thoracic cavity	INTRATHORACIC	C38207
54	Intratumoral	Administration of a medicinal product directly into a tumor	INTRATUMOR	C38269
55	Intrauterine	Administration of a medicinal product to the cavity of the uterus.	INTRAUTERINE	C38272
56	Intravenous	Injection of a medicinal product into a vein.	INTRAVENOUS	C38276
57	Intravesical	Administration of a medicinal product to the urinary bladder.	INTRAVESICAL	C38278
58	Intravitreal	Administration of a medicinal product into the rear chamber of the eye.	INTRAVITREAL	C38280
59	Iontophoresis	A technique of introducing ionic medicinal compounds into the body through the skin by applying a local electric current	IONTOPHORESIS	C38203
60	Irrigation	Administration to bath or flush open wounds or body cavities	IRRIGATION	C38281
61	Laryngopharyngeal	Administration of a medicinal product to the laryngopharynx for a local effect (anaesthetics).	LARYNGEAL	C38282

62	Nasal	Administration of a medicinal product to the nose to obtain a systemic or local effect. Inhalation therapy intended for the lower respiratory tract is excluded; see inhalation use.	NASAL	C38284
63	Nebulisation	Veterinary use only Administration of a veterinary medicinal product converted into an aerosol for mass medication, for example of birds.	RESPIRATORY (INHALATION)	C38216
64	Ocular	Administration of a medicinal product upon the eyeball and/or conjunctiva.	OPHTHALMIC	C38287
65	Oculonasal	Veterinary use only Administration of a veterinary medicinal product by dropping it into the eyes and nares of birds.	OCULONASAL	C85520
66	Oral	Taking a medicinal product by means of swallowing.	ORAL	C38288
67	Oropharyngeal	Administration of a medicinal product to the oropharynx (throat) to obtain a local effect.	OROPHARYNGEAL	C38289
68	Other	route exposure not otherwise described	Other	C38290
69	Paravertebral	Veterinary use only Injection of a veterinary medicinal product along the spinal column of animals.	INTRASPINAL	C38263
70	Parenteral	Administration by injection, infusion or implantation. To be used only where the parenteral route has not been specified (e.g., intravenous, subcutaneous etc.) or where a product may have many parenteral routes.	PARENTERAL	C38291
71	Periarticular	Injection of a medicinal product around a joint.	PERIARTICULAR	C38292
72	Perineural	Injection of a medicinal product into the direct surroundings of one or more nerves (commonly used terms by veterinarians include block infiltration and caudal block.)	PERINEURAL	C38293
73	Periodontal	Administration to the pouch between the tooth and the gingiva.	PERIODONTAL	C38294
74	Periosteal	Administration of a medicinal product on the periost	PERIOSTEAL	C65042
75	Pour-on	Veterinary use only Administration of a veterinary medicinal product by pouring onto the dorsal midline of the animal or to the top of the head and around the base of the horns.	TOPICAL	C38304
76	Rectal	Administration of a medicinal product to the rectum in order to obtain a local or systemic effect.	RECTAL	C38295
77	Respiratory	Administration of a medicinal product to the respiratory system if the route is not otherwise specified (e.g. inhalation)	RESPIRATORY (INHALATION)	C38216
78	Retrobulbar	Administration of a medicinal product behind the eyeball	RETROBULBAR	C38296
79	Skin scarification	Administration of a medicinal product by scratching the skin.	INTRAEPIDERMAL	C38243
80	Spot-on	Veterinary use only Administration of a veterinary medicinal product to a single site on the back of the animal or the base of the poll of the head.	TOPICAL	C38304
81	Spray	Administration of a medicinal product through spraying.	TOPICAL	C38304
82	Subconjunctival	Injection of a medicinal product underneath the conjunctiva.	SUBCONJUNCTIVAL	C38298
83	Subcutaneous	Injection of a medicinal product directly underneath the skin.	SUBCUTANEOUS	C38299
84	Sublingual	Administration of a medicinal product under the tongue to obtain a systemic effect.	SUBLINGUAL	C38300
85	Submucosal	Administration of a medicinal product under the mucosa.	SUBMUCOSAL	C38301
86	Teat	Veterinary use only Administration of a veterinary medicinal product to the surface of teat(s). Teat dipping is included.	TOPICAL	C38304
87	Top-dressing	Veterinary use only Administration of a veterinary medicinal product by application onto the surface of the feed immediately prior to feeding.	ORAL	C38288

88	Topical	Administration of a medicinal product to an area on the outersurface of the body	TOPICAL	C38304
89	Transdermal	Administration of a medicinal product to the skin in order to obtain a systemic effect after passing through the skin barrier, by diffusion.	TRANSDERMAL	C38305
90	Transmammary	Administration of a medicinal product via a transmission through the milk to the offspring	TOPICAL	C38304
91	Transplacental	Administration of a medicinal product across the placenta.	TRANSPLACENTAL	C38307
92	Unknown	Route of exposure not known	Unknown	C38311
93	Urethral	Administration of a medicinal product to the urethra.	URETHRAL	C38271
94	Vaginal	Administration of a medicinal product to the vagina.	VAGINAL	C38313
95	Water-borne	Veterinary use only Administration of a veterinary medicinal product to aquatic (marine or fresh water) species by medication of the water environment.	IMMERSION	C85516
96	Wing-web-stab	Veterinary use only Administration of a veterinary medicinal product into the wing-web of a bird.	PERCUTANEOUS	C38676

VICH CODES	UNITS OF PRESENTATION	DEFINITION
C48473	ampule	A dosing measurement based on the ampule unit
C25397	application	A predetermined amount of medicated gel, paste, ointment, or cream as specified on the product label.
C62412	applicator	A dosing measurement based on the applicator unit
C48474	bag	A dosing measurement based on the bag unit
C48475	bar	A dosing measurement based on the bar unit
C53495	bead	A dosing measurement based on the bead unit
C54564	blister	A dosing measurement based on the blister unit
C61569	blister pack	A dosing measurement based on the blister pack unit
C53498	block	A dosing measurement based on the block unit
C48476	bolus	A dosing measurement based on the bolus unit
C48477	bottle	A dosing unit that contains medicinal substance(s) in the form of a receptacle with a narrow neck designed to accept a specific closure
C48478	box	A dosing measurement based on the box unit
C48479	can	A dosing measurement based on the can unit
C62413	canister	A dosing measurement based on the canister unit
C48480	capsule	A dosing unit that contains medicinal substance(s) enclosed within a soft or hard shell, usually made from gelatin, starch, or cellulose, or other suitable material
C54702	carton	A dosing measurement based on the carton unit
C48481	cartridge	A dosing measurement based on the cartridge unit
C62414	case	A dosing measurement based on the case unit
C62274	cello pack	A dosing measurement based on the cello pack unit
C48483	coat	A dosing measurement based on the coat unit
C82481	collar	A medication-infused band placed on an animal
C48484	container	A dosing measurement based on the container unit
C82482	cryule	An ampoule used to store medications at intense cold
C54703	cup	A dosing measurement based on the cup unit
C48489	cylinder	A dosing measurement based on the cylinder unit
C16830	device	Any physical object that is useful for prevention, diagnosis, or treatment of disease or other conditions
C62415	dewar	A dosing measurement based on the dewar unit
C62416	dialpack	A dosing measurement based on the dual pack(synonym dialpack) unit
C82483	dip	A medicated liquid applied to the entire animal, e.g. by immersion
C48490	disk	A dosing measurement based on the disk unit
C25488	dose	A predetermined strength of a biologic
C62417	dose pack	A dosing measurement based on the dose pack unit
C48491	drops	A unit of volume used in pharmacy and equal to 0.05 milliliter (20 drops/ml)
C48492	drum	A dosing measurement based on the drum unit
C53499	film	A dosing measurement based on the film unit
C48496	generator	A dosing measurement based on the generator unit
C48499	implant	A dosing measurement based on the implant unit
C48501	inhalation	A dosing unit equal to the amount of the medicinal substance(s) delivered via the respiratory tract by one oral or nasal inhalation in the form of a gas, aerosol, mist, liquid, or fine powder using a nebulizer or an aerosol device, or the force of natural
C62275	inhaler	A dosing measurement based on the inhaler unit
C62418	inhaler, refill	A dosing measurement based on the inhaler refill dosing unit
C62276	insert	A dosing measurement based on the insert dosing unit
C48502	jar	A dosing measurement based on the jar unit
C62419	jug	A dosing measurement based on the jug unit
C48504	kit	A dosing measurement based on the kit unit
C48506	lozenge	A dosing measurement based on the lozenge unit
C17649	other	Different than the one(s) previously specified or mentioned
C48520	package	A dosing measurement based on the package unit
C48521	packet	A dosing unit equal to the amount of medicinal substance(s) contained in a single item of a packet dosage form
C82484	paper	A medication-infused sheet of material placed on the premises
C48522	parts	A dosing measurement based on the part dosing unit
C48524	patch	A dosing unit equal to the amount of medicinal substance(s) contained in a single item of a patch drug delivery system which often has an adhesive backing that is applied to an external site on the body
C48525	pellet	A dosing measurement based on the pellet unit
C48530	pouch	A dosing measurement based on the pouch unit
C62609	ring	A dosing measurement based on the ring unit
C48536	scoopful	A dosing measurement based on the scoopful unit
C53502	sponge	A dosing measurement based on the sponge unit
C48537	spray	A dosing unit equal to the amount of medicinal substance(s) contained in the volume of liquid delivered by the single operation of a spray dosage form container
C53503	stick	A dosing measurement based on the stick unit
C48538	strip	A dosing measurement based on the strip unit
C62420	supersack	A dosing measurement based on the supersack unit

C48539	suppository	A dosing unit equal to the amount of medicinal substance(s) contained in a single item of a suppository dosage form that is designed for introduction into the orifice of the human body and usually melts, softens, or dissolves at body temperature
C53504	swab	A dosing measurement based on the swab unit
C48540	syringe	A dosing measurement based on the syringe unit
C48542	tablet	A dosing unit equal to the amount of medicinal substance(s) contained in a single item of a tablet dosage form comprising of compressed medicinal substance(s) with or without suitable diluents
C62421	tabminder	A dosing measurement based on the tabminder unit
C82486	tag	A medication-infusion product attached to an animal
C48543	tampon	A dosing measurement based on the tampon unit
C62422	tank	A dosing measurement based on the tank unit
C48545	test	A dosing measurement based on the test unit
C54704	tray	A dosing measurement based on the tray unit
C48548	troche	A dosing unit equal to the amount of medicinal substance(s) contained in a single item of a discoid-shaped solid oral dosage form containing the medicinal agent in a suitably flavored base
C48549	tube	A dosing measurement based on the tube unit
C17988	unknown	Not known, not observed, not recorded, or refused
C48551	vial	A dosing measurement based on the vial unit
C48552	wafer	A dosing measurement based on the wafer unit

VICH CODES	Units of Measurement GL42: B.1.9.2.1, B.1.9.3.1, B.2.1.7.1.1.1, B.2.1.7.1.2.1.1, B.2.2.1.1.1 and B.3.5.1.1)	English Meaning
s	s	Second
min	min	Minute
h	h	Hour
d	d	Day
wk	wk	Week
mo	mo	Month
a	a	Year
g	g	Gram
mg	mg	Milligram
ug	ug	Microgram
ng	ng	Nanogram
kg	kg	Kilogram
L	L	Liter
mL	mL	Milliliter
uL	uL	Microliter
Ci	Ci	Curie
mCi	mCi	Millicurie
uCi	uCi	Microcurie
meq	meq	Milliequivalent
cm	cm	Centimeter
um	um	Micrometer
mm	mm	Millimeter
mol	mol	Mole
mmol	mmol	Millimole
umol	umol	Micromole
nmol	nmol	Nanomole
[CCID_50]	[CCID_50]	Units for vaccines. [CCID_50] = 50% cell culture infectious dose
[iU]	[iU]	International Units
[TCID_50]	[TCID_50]	Units for vaccines. [TCID_50] = 50% tissue culture infectious dose
C.F.U.	C.F.U.	Colony Forming Units
P.F.U.	P.F.U.	Plaque Forming Units
Bq	Bq	becquerel
MBq	MBq	megabecquerel
kBq	kBq	kilobecquerel
[sm_i]	[sm_i]	squared meter, [sm_i]
[cm_i]	[cm_i]	cubic meter, [cm_i]

[scm_i]	[scm_i]	squared centimeters,[scm_i]
EID	EID	Embryo infective dose
Other	Other	A unit of measurement not otherwise defined
Unknown	Unknown	The unit of measurement is unknown
RP	RP	Relative Potency Vaccine Value

PLEASE SEE VICH GL30 - Intermediately the FDA list is to be used (see p. Dosage Forms (F				
VICH Codes	VICH GL30 Dosage form term GL42 B.2.2.2	Definition	FDA Code	FDA Term
C42887	aerosol	A product that is packaged under pressure and contains therapeutically active ingredients that are released upon activation of an appropriate valve system; it is intended for topical application to the skin as well as local application into the nose (nasal aerosols), mouth (lingual aerosols), or lungs (inhalation aerosols).	C42887	AEROSOL
C42888	aerosol, foam	A dosage form containing one or more active ingredients, surfactants, aqueous or non-aqueous liquids, and the propellants; if the propellant is in the internal (discontinuous) phase (i.e., of the oil-in-water type), a stable foam is discharged, and if the propellant is in the external (continuous) phase (i.e., of the water-in-oil type), a spray or a quick-breaking foam is discharged.	C42888	AEROSOL, FOAM
C42889	aerosol, spray	An aerosol product which utilizes a compressed gas as the propellant to provide the force necessary to expel the product as a wet spray; it is applicable to solutions of medicinal agents in aqueous solvents.	C42889	AEROSOL, SPRAY
1	bait	Any substance used to attract prey.	C43002	UNASSIGNED
C42892	bar, chewable	A solid dosage form usually in the form of a rectangle that is meant to be chewed.	C42892	BAR, CHEWABLE
C42890	bead	A solid dosage form in the shape of a small ball.	C42890	BEAD
C43451	bead, implant, extended release	A small sterile solid mass consisting of a highly purified drug intended for implantation in the body which would allow at least a reduction in dosing frequency as compared to that drug presented as a conventional dosage form.	C43451	BEAD, IMPLANT, EXTENDED RELEASE
2	bee smoke paper	Piece of paper which when lit delivers smoke.	C87537	SMOKE PAPER
3	bee smoke stick	Stick which when lit delivers smoke.	C87536	SMOKE STICK
4	bee-hive strip	A matrix impregnated with an active substance (s) which is released by vaporisation or by physical contact over a period of time.	C47914	STRIP
C42891	block	Solid dosage form, usually in the shape of a square or rectangle.	C42891	BLOCK
5	bolus	A large time-release tablet that stays in the rumen of cattle, goats and sheep. It can also refer to a dose of liquid injected subcutaneously with a hypodermic needle, such as saline solution administered either to counteract dehydration or especially to mitigate kidney failure. Before it is fully absorbed, which can take several minutes or longer, the liquid remains in the form of a bolus, a ball or lump under the animal's skin.	C42998	TABLET
6	buccal tablet	Tablet to be applied to the buccal cavity (pouch) to obtain a systemic effect.	C42998	TABLET
7	cachet	Solid disc-shaped dosage form made of wafer enclosing a unit-dose for oral use	C43003	WAFER
C25158	capsule	A solid pharmaceutical dosage form that contains medicinal agent within either a hard or soft soluble container or shell, usually used for the oral administration of medicine. The shells are made of a suitable form of gelatin or other substance.	C25158	CAPSULE

C42895	capsule, coated	A solid dosage form in which the drug is enclosed within either a hard or soft soluble container or "shell" made from a suitable form of gelatin; additionally, the capsule is covered in a designated coating.	C42895	CAPSULE, COATED
C42896	capsule, coated pellets	A solid dosage form in which the drug is enclosed within either a hard or soft soluble container or "shell" made from a suitable form of gelatin; the drug itself is in the form of granules to which varying amounts of coating have been applied.	C42896	CAPSULE, COATED PELLETS
C42917	capsule, coated, extended release	A solid dosage form in which the drug is enclosed within either a hard or soft soluble container or "shell" made from a suitable form of gelatin; additionally, the capsule is covered in a designated coating, and which releases a drug (or drugs) in such a manner to allow at least a reduction in dosing frequency as compared to that drug (or drugs) presented as a conventional dosage form.	C42917	CAPSULE, COATED, EXTENDED RELEASE
C42902	capsule, delayed release	A solid dosage form in which the drug is enclosed within either a hard or soft soluble container made from a suitable form of gelatin, and which releases a drug (or drugs) at a time other than promptly after administration. Enteric-coated articles are delayed release dosage forms.	C42902	CAPSULE, DELAYED RELEASE
C42904	capsule, delayed release pellets	A solid dosage form in which the drug is enclosed within either a hard or soft soluble container or "shell" made from a suitable form of gelatin; the drug itself is in the form of granules to which enteric coating has been applied, thus delaying release of the drug until its passage into the intestines.	C42904	CAPSULE, DELAYED RELEASE PELLETS
C42916	capsule, extended release	A solid dosage form in which the drug is enclosed within either a hard or soft soluble container made from a suitable form of gelatin, and which releases a drug (or drugs) in such a manner to allow a reduction in dosing frequency as compared to that drug (or drugs) presented as a conventional dosage form.	C42916	CAPSULE, EXTENDED RELEASE
C42928	capsule, film coated, extended release	A solid dosage form in which the drug is enclosed within either a hard or soft soluble container or "shell" made from a suitable form of gelatin; additionally, the capsule is covered in a designated film coating, and which releases a drug (or drugs) in such a manner to allow at least a reduction in dosing frequency as compared to that drug (or drugs) presented as a conventional dosage form.	C42928	CAPSULE, FILM COATED, EXTENDED RELEASE
C42936	capsule, gelatin coated	A solid dosage form in which the drug is enclosed within either a hard or soft soluble container made from a suitable form of gelatin; through a banding process, the capsule is coated with additional layers of gelatin so as to form a complete seal.	C42936	CAPSULE, GELATIN COATED
C42954	capsule, liquid filled	A solid dosage form in which the drug is enclosed within a soluble, gelatin shell which is plasticized by the addition of a polyol, such as sorbitol or glycerin, and is therefore of a somewhat thicker consistency than that of a hard shell capsule; typically, the active ingredients are dissolved or suspended in a liquid vehicle.	C42954	CAPSULE, LIQUID FILLED
C45414	cement	A substance that serves to produce solid union between two surfaces.	C45414	CEMENT

C42678	cigarette	A narrow tube filled with material that is capable to burn with release of therapeutically-active substance(s) during the process of smoking. Cigarette is a very efficient drug-delivery inhaler system for fast-acting substances.	C42678	CIGARETTE
C60884	cloth	A large piece of relatively flat, absorbent material that contains a drug. It is typically used for applying medication or for cleansing.	C60884	CLOTH
8	collar	Matrix impregnated with active substance(s) which is worn around the animals neck. The active substance(s) are released by diffusion by mechanical means or by vaporisation over a period of time.	TBD	COLLAR
9	collodion	Liquid usually containing pyroxylin in a mixture of ether and ethanol. Forms a flexible film at the site of application	C42986	SOLUTION
10	compressed lozenge	Compressed solid dosage form to be sucked to obtain a systemic or a local effect. Short term: Lozenge*	C42955	LOZENGE
C60891	concentrate	A liquid preparation of increased strength and reduced volume which is usually diluted prior to administration.	C60891	CONCENTRATE
11	concentrate and diluent for solution for infusion	A concentrate and its diluting agent used to prepare solution for infusion (solution obtained by steeping or soaking a substance)	C43002	UNASSIGNED
12	concentrate and diluent for solution for injection	A concentrate and its diluting agent used to prepare solution for injection	C43002	UNASSIGNED
13	concentrate and solvent for concentrate and solution for a concentrate and infusion	A concentrate and its liquid or gas that dissolves this solid, liquid, or gaseous solute, to obtain a solution for infusion	C43002	UNASSIGNED
14	concentrate and solvent for cutaneous solution	A concentrate and its liquid or gas that dissolves this solid, liquid, or gaseous solute, to obtain a solution to be applied to the skin	C43002	UNASSIGNED
15	concentrate and solvent for cutaneous use	A concentrate and its liquid or gas that dissolves this solid, liquid, or gaseous solute, to obtain a solution to be applied to the skin	C43002	UNASSIGNED
16	concentrate and solvent for injection	A concentrate and its liquid or gas that dissolves this solid, liquid, or gaseous solute, to be used as injection.	C43002	UNASSIGNED
17	concentrate for cutaneous solution	A concentrate to be diluted to produce a solution applied to the skin	C60891	CONCENTRATE
18	concentrate for cutaneous spray, emulsion	A concentrate to be dispersed in a liquid to produce an emulsion to be sprayed.	C60891	CONCENTRATE
19	concentrate for dip emulsion	A concentrate to be dispersed to produce dip emulsion	C60891	CONCENTRATE
20	concentrate for dip solution	A concentrate to be dissolved to produce dip solution	C60891	CONCENTRATE
21	concentrate for dip suspension	A concentrate to be dispersed to produce dip suspension	C60891	CONCENTRATE
22	concentrate for oral solution	A concentrate to be diluted to produce a solution for oral use	C60891	CONCENTRATE
23	concentrate for oral/rectal solution	A concentrate to be diluted to produce a solution for oral or rectal use	C60891	CONCENTRATE
24	concentrate for rectal solution	A concentrate to be diluted to produce a solution for rectal use.	C60891	CONCENTRATE
25	concentrate for solution for fish treatment	Concentrate to be diluted to produce a solution intended for the treatment of fish by immersion	C60891	CONCENTRATE
26	concentrate for solution for infusion	A concentrate to be diluted to produce a solution for infusion (solution obtained by steeping or soaking a substance).	C60891	CONCENTRATE
27	concentrate for solution for injection	A concentrate to be diluted to produce a solution for injection.	C60891	CONCENTRATE

28	concentrate for solution for injection/infusion	A concentrate to be diluted to produce a solution for injection or infusion.	C60891	CONCENTRATE
29	concentrate for solution for intravesical use	A concentrate to be diluted to produce a solution to be injected in the bladder	C60891	CONCENTRATE
30	concentrate for suspension for infusion	A concentrate to be dispersed in a liquid vehicle to produce an suspension for infusion (solution obtained by steeping or soaking a substance)	C60891	CONCENTRATE
C42900	cone	A solid dosage form bounded by a circular base and the surface formed by line segments joining every point of the boundary of the base to a common vertex. A cone (usually containing antibiotics) is normally placed below the gingiva after a dental extraction.	C42900	CONE
31	continuous-release intraruminal device	Solid preparations each containing one or more active substances intended for oral administration to ruminant animals and designed to be retained in the rumen to release the active substance(s) at a defined rate over a defined period of time. This may be achieved by erosion, corrosion, diffusion, osmotic pressure or any other suitable chemical, physical or physico-chemical means.	C87538	INTRARUMINAL DEVICE, EXTENDED RELEASE
C42919	core, extended release	An ocular system placed in the eye from which the drug diffuses through a membrane at a constant rate over a specified period.	C42919	CORE, EXTENDED RELEASE
C28944	cream	A semisolid emulsion of either the oil-in-water or the water-in-oil type, ordinarily intended for topical use.	C28944	CREAM
C60897	cream, augmented	A cream dosage form that enhances drug delivery. Augmentation does not refer to the strength of the drug in the dosage form. NOTE: CDER has decided to refrain from expanding the use of this dosage form due to difficulties in setting specific criteria that must be met to be considered augmented.	C60897	CREAM, AUGMENTED
C42901	crystal	A naturally produced angular solid of definite form in which the ultimate units from which it is built up are systematically arranged; they are usually evenly spaced on a regular space lattice.	C42901	CRYSTAL
C45415	culture	The propagation of microorganisms or of living tissue cells in special media conducive to their growth.	C45415	CULTURE
32	cutaneous and nasal ointment	Viscous semisolid preparation used topically on	C42966	OINTMENT
33	cutaneous emulsion	Emulsion to be applied on the skin.	C42913	EMULSION
34	cutaneous foam	Preparations consisting of large volumes of gas dispersed in a liquid generally containing one or more active substances, a surfactant ensuring their formation and various other excipients, intended to be applied on the skin.	C42888	AEROSOL, FOAM
35	cutaneous liquid	A liquid intended to be applied on the skin.	C42953	LIQUID
36	cutaneous paste	A paste intended to be applied on the skin.	C42967	PASTE
37	cutaneous powder	Spray is excluded. Powder intended to be applied on the skin.	C42972	POWDER
38	cutaneous solution	Solution intended to be applied on the skin.	C42986	SOLUTION
39	cutaneous sponge	Replaced by medicated sponge. Any specific route of administration is to be indicated through a combined term.	C47912	SPONGE
40	cutaneous spray	A spray intended to be applied on the skin.	C42962	SPRAY
41	cutaneous spray, ointment	Ointment to be sprayed on the skin.	C42966	OINTMENT
42	cutaneous spray, powder	Powder to be sprayed on the skin.	C42972	POWDER
43	cutaneous spray, solution	Solution to be sprayed on the skin.	C42989	SPRAY
44	cutaneous spray, suspension	Suspension to be sprayed on the skin.	C42990	SPRAY, SUSPENSION
45	cutaneous stick	Stick to be applied on the skin.	C42991	STICK
46	cutaneous suspension	Suspension to be applied on the skin.	C42994	SUSPENSION

47	dental emulsion	Emulsion to be applied on the teeth.	C42913	EMULSION
48	dental gel	Gel to be applied on the teeth.	C42934	GEL
49	dental liquid	Liquid to be applied on the teeth.	C42953	LIQUID
50	dental paste	Paste to be applied on the teeth.	C42967	PASTE
51	dental powder	Powder to be applied on the teeth.	C42972	POWDER
52	dental solution	Solution to be applied on the teeth.	C42986	SOLUTION
53	dental stick	Stick to be applied on the teeth.	C42991	STICK
54	dental suspension	Suspension to be applied on the teeth.	C42994	SUSPENSION
55	denture lacquer	Lacquer to be applied to dentures.	C42986	SOLUTION
C47890	diaphragm	A device usually dome-shaped, worn during copulation over the cervical mouth for prevention of conception or infection.	C47890	DIAPHRAGM
56	dip	Solutions, suspensions or emulsions of active substances intended to be applied by complete immersion.	C42986	SOLUTION
57	dip concentrate	Preparations containing one or more active substances, usually in the form of wettable powders, pastes, solutions or suspensions, which are used to prepare diluted solutions, suspensions or emulsions of active substances. The diluted preparations are applied by complete immersion of the animal.	C60891	CONCENTRATE
58	dip emulsion	Preparations containing one or more active substances, usually in the form of wettable powders, pastes, solutions or suspensions, which are used to prepare diluted emulsions of active substances. The diluted preparations are applied by complete immersion of the animal.	C42913	EMULSION
59	dip solution	Preparations containing one or more active substances, usually in the form of wettable powders, pastes, solutions or suspensions, which are used to prepare diluted solutions, of active substances. The diluted preparations are applied by complete immersion of the animal.	C42986	SOLUTION
60	dip suspension	Preparations containing one or more active substances, usually in the form of wettable powders, pastes, solutions or suspensions, which are used to prepare diluted suspensions of active substances. The diluted preparations are applied by complete immersion of the animal.	C42994	SUSPENSION
C43525	disc	The pharmaceutical dosage form of a flat, circular shape containing solid or powdered medicine, e.g. disk with powdered agent for inhalation, or transdermal disk.	C43525	DISC
61	dispersible tablet	To be dispersed in liquid before being swallowed.	C61005	TABLET, FOR SUSPENSION
62	dispersion	A system consisting of 2 or more phases. To be used only when suspension or emulsion are not appropriate.	C42994	SUSPENSION
C42679	douche	A liquid preparation, intended for the irrigative cleansing of the vagina, that is prepared from powders, liquid solutions, or liquid concentrates and contains one or more chemical substances dissolved in a suitable solvent or mutually miscible solvents.	C42679	DOUCHE
C42763	dressing	A dosage form designed for local administration, usually placed on a pad that will cover an affected area. This dosing form is used in order to support the natural healing process, protect granulation tissue and nerve endings and to reduce the risk of secondary infection.	C42763	DRESSING
63	drop(s)	Liquid medicine given in a dose or form of globules from a medicine dropper.	C60992	SOLUTION/ DROPS

64	drug premix	Mixtures of one or more active substances, usually in suitable bases, that are prepared to facilitate feeding the active substances to animals. They are used exclusively in the preparation of medicated feeding stuffs.		
65	ear cream	Multiphase preparations consisting of a lipophilic phase and an aqueous phase, suitable for application to the auditory meatus	C28944	CREAM
66	ear drops	Solutions, emulsions or suspensions of one or more active substances in liquids suitable for application to the auditory meatus without exerting harmful pressure on the ear-drum (for example, water, glycols or fatty oils).	C43002	SOLUTION/ DROPS
67	ear drops, emulsion	Emulsion to be applied to the auditory meatus.	C42913	EMULSION
68	ear drops, powder and solvent for suspension	Powder to be diluted in its solvent to produce a suspension to be applied to the auditory meatus.	C42975	POWDER, FOR SUSPENSION
69	ear drops, solution	Solution to be applied as drops to the auditory meatus.	C42986	SOLUTION
70	ear drops, suspension	Suspension to be applied as drops to the auditory meatus.	C42994	SUSPENSION
71	ear gel	Gel to be applied in the auditory meatus.	C42934	GEL
72	ear ointment	Ointment suitable for application to the external auditory meatus	C42966	OINTMENT
73	ear powder	Preparations consisting of solid, loose, dry particles of varying degrees of fineness, suitable for application to the auditory meatus.	C42972	POWDER
74	ear spray	Solutions, emulsions or suspensions of one or more active substances in liquids suitable for application to the auditory meatus without exerting harmful pressure on the ear-drum.	C42989	SPRAY
75	ear spray, emulsion	Emulsions of one or more active substances in liquids suitable for application to the auditory meatus without exerting harmful pressure on the ear-drum.	TBD	Adding new FDA term: SPRAY, EMULSION
76	ear spray, solution	Solutions of one or more active substances in liquids suitable for application to the auditory meatus without exerting harmful pressure on the ear-drum.	C42989	SPRAY
77	ear spray, suspension	Suspensions of one or more active substances in liquids suitable for application to the auditory meatus without exerting harmful pressure on the ear-drum.	C42990	SPRAY, SUSPENSION
78	ear stick	Stick suitable for application to the auditory meatus.	C42991	STICK
79	ear tag	Matrix impregnated with active substance(s) which is fixed on a device to be tagged on the animals ear. The active substance(s) are released by diffusion by mechanical means or by vaporisation over a period of time.	C87539	TAG
80	ear tampon	Tampons intended to be inserted into the external auditory meatus.	C47892	TAMPON
81	ear wash	Preparations intended to cleanse the external auditory meatus. They are usually aqueous solutions with apH within physiological limits.	C42986	SOLUTION
82	ear wash, emulsion	Emulsions intended to cleanse the external auditory meatus.	C42913	EMULSION
83	ear wash, solution	Solution intended to cleanse the external auditory meatus.	C42986	SOLUTION
84	ear/eye drops, solution	Drops of solutions of one or more active substances in liquids suitable for application to the auditory meatus without exerting harmful pressure on the ear-drum.	C42986	SOLUTION

85	ear/eye ointment	Ointment suitable for application to the external auditory meatus or to the conjunctiva.	C42966	OINTMENT
86	ear/eye/nose drops, solution	Drops of solution of one or more active substances in liquids suitable for application to the auditory meatus, for instillation into the eye, for application to the nasal cavities.	C42986	SOLUTION
87	effervescent granules	Uncoated granules generally containing acid substances and carbonates or hydrogen carbonates which react rapidly in the presence of water to release carbon dioxide. They are intended to be dissolved or dispersed in water before administration.	C42909	GRANULE, EFFERVESCENT
88	effervescent powder	Powder presented as single-dose or multidose preparations and generally contain acid substances and carbonates or hydrogen carbonates which react rapidly in the presence of water to release carbon dioxide. They are intended to be dissolved or dispersed in water before administration.	C64884	POWDER, EFFERVESCENT
89	effervescent tablet	Uncoated tablets generally containing acid substances and carbonates or hydrogen carbonates which react rapidly in the presence of water to release carbon dioxide. They are intended to be dissolved or dispersed in water before administration.	C42910	TABLET, EFFERVESCENT
90	effervescent vaginal tablet	Uncoated tablets generally containing acid substances and carbonates or hydrogen carbonates which react rapidly in the presence of water to release carbon dioxide. They are intended to be dissolved or dispersed in water before administration in the vagina.	C42910	TABLET, EFFERVESCENT
C42912	elixir	A clear, pleasantly flavored, sweetened hydroalcoholic liquid containing dissolved medicinal agents; it is intended for oral use.	C42912	ELIXIR
C42913	emulsion	A dosage form consisting of a two-phase system comprised of at least two immiscible liquids (1), one of which is dispersed as droplets (internal or dispersed phase) within the other liquid (external or continuous phase), generally stabilized with one or more emulsifying agents. Note 1: A liquid is pourable; it flows and conforms to its container at room temperature. It displays Newtonian or pseudoplastic flow behavior. Note 2: Emulsion is used as a dosage form term unless a more specific term is applicable, e.g. cream, lotion, ointment.	C42913	EMULSION
91	emulsion for infusion	Emulsion complying with requirements for infusion.	C42914	INJECTION, EMULSION
92	emulsion for injection	Sterile emulsions prepared by emulsifying the active substance(s) and any added excipients in Water for injections, in a suitable, sterile non aqueous liquid or in a mixture of these vehicles.	C42914	INJECTION, EMULSION
93	emulsion for injection/infusion	Emulsion complying with requirements for injection/ infusion.	C42914	INJECTION, EMULSION
94	endocervical gel	Gel intended for application on endocervical mucosis.	C42934	GEL
95	endosinusal wash, suspension	Suspension complying with requirements for endosinusal wash.	C42994	SUSPENSION
96	endotracheopulmonary instillation	Installation suitable for endotracheopulmonary use.	C43002	UNASSIGNED
97	endotracheopulmonary instillation	powder to be dissolved in solvent to produce a solution for endotracheopulmonary instillation.	C42973	POWDER, FOR SOLUTION

98	endotracheopulmonary instillation, powder for solution	Powder to be dissolved in an appropriate liquid vehicle to produce a solution for endotracheopulmonary instillation.	C42973	POWDER, FOR SOLUTION
99	endotracheopulmonary instillation, solution	Solution suitable for endotracheopulmonary instillation.	C42986	SOLUTION
100	endotracheopulmonary instillation, suspension	Suspension suitable for endotracheopulmonary instillation.	C42994	SUSPENSION
C42915	enema	A rectal preparation for therapeutic, diagnostic, or nutritive purposes.	C42915	ENEMA
C42929	extract	A concentrated preparation of vegetable or animal drugs obtained by removal of the active constituents of the respective drugs with a suitable menstrua, evaporation of all or nearly all of the solvent, and adjustment of the residual masses or powders to the prescribed standards.	C42929	EXTRACT
101	eye cream	Cream intended for application to the conjunctiva.	C28944	CREAM
102	eye drops	Sterile aqueous or oily solutions or suspensions of one or more active substances intended for instillation into the eye.	C60992	SOLUTION/ DROPS
103	eye drops, emulsion	Emulsion of one or more active substances intended for instillation into the eye.	C42913	EMULSION
104	eye drops, powder and solvent for solution	Powder supplied in a dry, sterile form to be dissolved in an appropriate liquid vehicle (solvent) at the time of administration, intended for instillation into the eye.	C42973	POWDER, FOR SOLUTION
105	eye drops, powder and solvent for suspension	Powder supplied in a dry, sterile form to be suspended in an appropriate liquid vehicle (solvent) at the time of administration, intended for instillation into the eye.	C42975	POWDER, FOR SUSPENSION
106	eye drops, prolonged-release	Modified-release eye drop, showing a slower release of the active substance(s) than that of conventional-release eye drop. Prolonged-release is achieved by a special formulation design and/or manufacturing method.	C60992	SOLUTION/ DROPS
107	eye drops, solution	Sterile aqueous or oily solutions of one or more active substances intended for instillation into the eye.	C42986	SOLUTION/ DROPS
108	eye drops, solvent for reconstitution	Powder supplied in a dry, sterile form to be dissolved or suspended in an appropriate liquid vehicle at the time of administration, intended for instillation into the eyes.	C42975	POWDER, FOR SOLUTION
109	eye drops, suspension	Sterile aqueous or oily suspensions of one or more active substances intended for instillation into the eye.	C42994	SUSPENSION
110	eye gel	Gel intended for application to the conjunctiva.	C42934	GEL
111	eye lotion	Sterile aqueous solutions intended for use in washing or bathing the eye or for impregnating eye dressings.	C29167	LOTION
112	eye lotion, solvent for reconstitution	Powder supplied in a dry, sterile form to be dissolved in an appropriate liquid vehicle (solvent) at the time of administration to produce a lotion intended for instillation into the eye.	C42975	POWDER, FOR SOLUTION
113	eye ointment	Ointment intended for application to the conjunctiva.	C42966	OINTMENT
C60926	fiber, extended release	A slender and elongated solid thread-like substance that delivers drug in such a manner to allow a reduction in dosing frequency as compared to that drug (or drugs) presented as a conventional dosage form.	C60926	FIBER, EXTENDED RELEASE
C42932	film	A thin layer or coating.	C42932	FILM

C42920	film, extended release	A drug delivery system in the form of a film that releases the drug over an extended period in such a way as to maintain constant drug levels in the blood or target tissue.	C42920	FILM, EXTENDED RELEASE
C42984	film, soluble	A thin layer or coating which is susceptible to being dissolved when in contact with a liquid.	C42984	FILM, SOLUBLE
C60927	for solution	A product, usually a solid, intended for solution prior to administration.	C60927	FOR SOLUTION
C60928	for suspension	A product, usually a solid, intended for suspension prior to administration.	C60928	FOR SUSPENSION
C60929	for suspension, extended release	A product, usually a solid, intended for suspension prior to administration; once the suspension is administered, the drug will be released at a constant rate over a specified period.	C60929	FOR SUSPENSION, EXTENDED RELEASE
114	frozen suspension and diluent for injection	Frozen suspension to be diluted, complying with requirements for injection.	C42994	SUSPENSION
115	gargle	Solution to be gargled.	C42986	SOLUTION
116	gargle/mouth wash		C42986	SOLUTION
C42933	gas	Any elastic aeriform fluid in which the molecules are separated from one another and have free paths.	C42933	GAS
117	gas and solvent for dispersion for injection/infusion	Gas to be dispersed in solvent, complying with requirements for injection/infusion substances.	C42933	GAS
118	gastroenteral emulsion	Emulsion suitable for gasrtoenteral use.	C42913	EMULSION
119	gastroenteral liquid	Liquid suitable for gasrtoenteral use.	C42953	LIQUID
120	gastroenteral solution	Solution suitable for gasrtoenteral use.	C42986	SOLUTION
121	gastroenteral suspension	Suspension suitable for gasrtoenteral use.	C42994	SUSPENSION
122	gastro-resistant capsule	Delayed-release capsules that are intended to resist the gastric fluid and to release their active substance or substances in the intestinal fluid.	C42902	CAPSULE, DELAYED RELEASE
123	gastro-resistant capsule, hard	Gastro-resistant capsule that have shells consisting of two prefabricated cylindrical sections one end of which is rounded and closed, the other being open.	C42902	CAPSULE, DELAYED RELEASE
124	gastro-resistant capsule, soft	Gastro-resistant capsule that have thicker shells than those of hard capsules. The shells consist of one part and are of various shapes.	C42902	CAPSULE, DELAYED RELEASE
125	gastro-resistant coated tablet	Delayed-release tablet covered with one or more layers of mixtures of various substances, intended to resist the gastric fluid and to release their active substance(s) in the intestinal fluid.	C42905	TABLET, DELAYED RELEASE
126	gastro-resistant granules	Delayed-release granules that are intended to resist the gastric fluid and to release the active substance(s) in the intestinal fluid. These properties are achieved by covering the granules with a gastro-resistant material (enteric-coated granules) or by other suitable means.	C42903	GRANULE, DELAYED RELEASE
127	gastro-resistant granules for oral suspension	Delayed-release granules that are intended to resist the gastric fluid and to release the active substance(s) in the intestinal fluid, dispersed in an appropriate liquid vehicle to produce a suspension for oral use.	C87540	GRANULES, FOR SUSPENSION, DELAYED RELEASE
128	gastro-resistant tablet	Delayed-release tablets that are intended to resist the gastric fluid and to release their active substance(s) in the intestinal fluid. Usually they are prepared from granules or particles already covered with a gastro-resistant coating or in certain cases by covering tablets with a gastro-resistant coating (enteric-coated tablets).	C42905	TABLET, DELAYED RELEASE

C42934	gel	A semisolid (1) dosage form that contains a gelling agent to provide stiffness to a solution or a colloidal dispersion (2). A gel may contain suspended particles. Note 1: A semisolid is not pourable; it does not flow or conform to its container at room temperature. It does not flow at low shear stress and generally exhibits plastic flow behavior. Note 2: A colloidal dispersion is a system in which particles of colloidal dimension (i.e., typically between 1 nm and 1 micrometer) are distributed uniformly throughout a liquid.	C42934	GEL
129	gel for injection	Gel complying with requirements for injection.	C42934	GEL
C42906	gel, dentifrice	A combination of a dentifrice (formulation intended to clean and/or polish the teeth, and which may contain certain additional agents), and a gel. It is used with a toothbrush for the purpose of cleaning and polishing the teeth.	C42906	GEL, DENTIFRICE
C60930	gel, metered	A gel preparation, with metered dose valves, which allow for the delivery of a uniform quantity of gel upon each activation.	C60930	GEL, METERED
C48193	generator	An apparatus for the formation of vapor or gas from a liquid or solid by heat or chemical action. The term GENERATOR also applies to radioactive columns from which radionuclides are provided.	C48193	GENERATOR
130	gingival gel	Gel intended for administration to the gingivae by means of a suitable applicator.	C42934	GEL
131	gingival paste	Paste intended for administration to the gingivae by means of a suitable applicator.	C42967	PASTE
132	gingival solution	Solution intended for administration to the gingivae by means of a suitable applicator.	C42986	SOLUTION
C42937	globule	Also called pellets or pilules, are made of pure sucrose, lactose, or other polysaccharides. They are formed into small globular masses of various sizes, and are medicated by placing them in a vial and adding the liquid drug attenuation in the proportion not less than one percent (v/w). After shaking, the medicated globules are dried at temperatures not to exceed 40 degrees Centigrade.	C42937	GLOBULE
C45416	graft	A slip of skin or of other tissue for implantation.	C45416	GRAFT
C42938	granule	A small particle or grain.	C42938	GRANULE
C42903	granule, delayed release	A small medicinal particle or grain to which an enteric or other coating has been applied, thus delaying release of the drug until its passage into the intestines.	C42903	GRANULE, DELAYED RELEASE
C42939	granule, for solution	A small medicinal particle or grain made available in its more stable dry form, to be reconstituted with solvent just before dispensing; the granules are so prepared to contain not only the medicinal agent, but the colorants, flavorants, and any other desired pharmaceutical ingredient.	C42939	GRANULE, FOR SOLUTION
C42940	granule, for suspension	A small medicinal particle or grain made available in its more stable dry form, to be reconstituted with solvent just before dispensing to form a suspension; the granules are so prepared to contain not only the medicinal agent, but the colorants, flavorants, and any other desired pharmaceutical ingredient.	C42940	GRANULE, FOR SUSPENSION

C42921	granule, for suspension, extended release	A small medicinal particle or grain made available in its more stable dry form, to be reconstituted with solvent just before dispensing to form a suspension; the extended release system achieves slow release of the drug over an extended period of time and maintains constant drug levels in the blood or target tissue.	C42921	GRANULE, FOR SUSPENSION, EXTENDED RELEASE
133	granules and solvent for suspension for injection	Granules to be dispersed in solvent to produce a suspension suitable for injection	C42940	GRANULE, FOR SUSPENSION
134	granules for oral and rectal suspension	Granules to be dispersed in an appropriate liquid vehicle to produce a suspension intended for oral and rectal use.	C42940	GRANULE, FOR SUSPENSION
135	granules for oral drops, solution	Granules to be dissolved in an appropriate liquid vehicle to produce a solution in form of drops, intended for oral use.	C42939	GRANULE, FOR SOLUTION
136	granules for oral solution	Granules diluted to produce a solution for oral use.	C42939	GRANULE, FOR SOLUTION
137	granules for oral suspension	Granules dispersed in a liquid to produce a suspension for oral use.	C42940	GRANULE, FOR SUSPENSION
138	granules for syrup	Granules to be diluted to obtain aqueous preparations characterised by sweet taste and a viscous consistency.	C42939	GRANULE, FOR SOLUTION
C42941	gum	A mucilaginous excretion from various plants.	C42941	GUM
C42894	gum, chewing	A sweetened and flavored insoluble plastic material of various shapes which when chewed, releases a drug substance into the oral cavity.	C42894	GUM, CHEWING
C42978	gum, resin	Natural mixture of gum and resin, usually obtained as exudations from plants.	C42978	GUM, RESIN
C42942	implant	A material containing drug intended to be inserted securely or deeply in a living site for growth, slow release, or formation of an organic union.	C42942	IMPLANT
139	implantation tablet	Small tablet meant for insertion under the skin by giving a small surgical cut into the skin which is stitched after insertion of the tablet. A special injector utilizing a hollow needle and plunger may be used to administer rod shaped tablet. These are designed for subcutaneous implantation in animal or man. Their purpose is to provide prolonged drug effect ranging from months to years.	C42998	TABLET
140	impregnated dressing	A piece or strip of gauze or other suitable fabric impregnated with a liquid or a semi-solid preparation	C42763	DRESSING
141	impregnated pad	A piece of absorbent material impregnated with a liquid preparation.	C60884	CLOTH
142	infusion	Sterile, aqueous solutions or emulsions with water as the continuous phase; usually made isotonic with blood. They are principally intended for administration in large volume. Infusions do not contain any added antimicrobial preservative.	C42946	INJECTION
C42944	inhalant	A special class of inhalations consisting of a drug or combination of drugs, that by virtue of their high vapor pressure, can be carried by an air current into the nasal passage where they exert their effect; the container from which the inhalant generally is administered is known as an inhaler.	C42944	INHALANT
143	inhalation gas	The use of this ST is discouraged; the use of "Medicinal gas compressed/cryogenic/liquefied" is preferred	C42933	GAS

144	inhalation powder	Single-dose powders or multidose powders in which active substances may be combined with a suitable carrier. They are generally administered by dry-powder inhalers.	C42972	POWDER
145	inhalation powder, hard capsule	Capsule that have shells consisting of two prefabricated cylindrical sections one end of which is rounded and closed, the other being open, containing powder for inhalation.	C42972	POWDER
146	inhalation powder, pre-dispensed	Hard capsule is excluded. Short term: Inhalation powder*	C42972	POWDER
147	inhalation solution	Liquid preparation intended for administration as vapours or aerosols to the lung in order to obtain a local or systemic effect. They contain one or more active substances which may be dissolved or dispersed in a suitable vehicle.	C42986	SOLUTION
148	inhalation vapour	Medicinal preparation to be administered by inhalation.	C42933	GAS
149	inhalation vapour, capsule	Capsule intended for administration as vapour to the lung in order to obtain a local or systemic effect, it contains one or more active substance which may be dissolved or dispersed in a suitable vehicle.	C42933	GAS
150	inhalation vapour, effervescent tablet	Uncoated tablets generally containing acid substances and carbonates or hydrogen carbonates which react rapidly in the presence of water to release carbon dioxide. They are intended to be dissolved or dispersed in water before administration by inhalation of vapour.	C42933	GAS
151	inhalation vapour, emulsion	Emulsion intended for administration as vapour to the lung in order to obtain a local or systemic effect, it contains one or more active substance which may be emulsified a suitable vehicle.	C42933	GAS
152	inhalation vapour, impregnated pad	Pad impregnated of active substance, intended for administration as vapour to the lung in order to obtain a local or systemic effect, it contains one or more active substance.	C42933	GAS
153	inhalation vapour, liquid	e.g. essential oils. Short term: Inhalation vapour*	C42933	GAS
154	inhalation vapour, ointment	Semi solid preparation intended for administration as vapour to the lung in order to obtain a local or systemic effect, containing one or more active substance.	C42933	GAS
155	inhalation vapour, powder	Powder intended for administration as vapour to the lung in order to obtain a local or systemic effect, it contains one or more active substance which may be dissolved in a suitable vehicle.	C42933	GAS
156	inhalation vapour, solution	Solution added to hot water to generate vapour that can be inhaled.	C42933	GAS
157	inhalation vapour, tablet	Solid preparation intended for administration as vapour to the lung in order to obtain a local or systemic effect, it contains one or more active substance which may be dissolved or dispersed in a suitable vehicle.	C42933	GAS
C60931	injectable, liposomal	An injection, which either consists of or forms liposomes (a lipid bilayer vesicle usually composed of phospholipids which is used to encapsulate an active drug substance).	C60931	INJECTABLE, LIPOSOMAL
C42946	injection	A sterile preparation intended for parenteral use; five distinct classes of injections exist as defined by the USP.	C42946	INJECTION

C42914	injection, emulsion	An emulsion consisting of a sterile, pyrogen-free preparation intended to be administered parenterally.	C42914	INJECTION, EMULSION
C42950	injection, lipid complex	A parenteral pharmaceutical dosage form that contains a drug molecularly associated with natural or synthetic lipids.	C42950	INJECTION, LIPID COMPLEX
C42974	injection, powder, for solution	A sterile preparation intended for reconstitution to form a solution for parenteral use.	C42974	INJECTION, POWDER, FOR SOLUTION
C42976	injection, powder, for suspension	A sterile preparation intended for reconstitution to form a suspension for parenteral use.	C42976	INJECTION, POWDER, FOR SUSPENSION
C42977	injection, powder, for suspension, extended release	A dried preparation intended for reconstitution to form a suspension for parenteral use which has been formulated in a manner to allow at least a reduction in dosing frequency as compared to that drug presented as a conventional dosage form (e.g., as a solution).	C42977	INJECTION, POWDER, FOR SUSPENSION, EXTENDED RELEASE
C42959	injection, powder, lyophilized, for liposomal suspension	A sterile freeze dried preparation intended for reconstitution for parenteral use which has been formulated in a manner that would allow liposomes (a lipid bilayer vesicle usually composed of phospholipids which is used to encapsulate an active drug substance, either within a lipid bilayer or in an aqueous space) to be formed upon reconstitution.	C42959	INJECTION, POWDER, LYOPHILIZED, FOR LIPOSOMAL SUSPENSION
C42957	injection, powder, lyophilized, for solution	A dosage form intended for the solution prepared by lyophilization ('freeze drying'), a process which involves the removal of water from products in the frozen state at extremely low pressures; this is intended for subsequent addition of liquid to create a solution that conforms in all respects to the requirements for Injections.	C42957	INJECTION, POWDER, LYOPHILIZED, FOR SOLUTION
C42958	injection, powder, lyophilized, for suspension	A liquid preparation, intended for parenteral use, that contains solids suspended in a suitable fluid medium and conforms in all respects to the requirements for Sterile Suspensions; the medicinal agents intended for the suspension are prepared by lyophilization ("freeze drying"), a process which involves the removal of water from products in the frozen state at extremely low pressures.	C42958	INJECTION, POWDER, LYOPHILIZED, FOR SUSPENSION
C42956	injection, powder, lyophilized, for suspension, extended release	A sterile freeze dried preparation intended for reconstitution for parenteral use which has been formulated in a manner to allow at least a reduction in dosing frequency as compared to that drug presented as a conventional dosage form (e.g., as a solution).	C42956	INJECTION, POWDER, LYOPHILIZED, FOR SUSPENSION, EXTENDED RELEASE
C42945	injection, solution	A liquid preparation containing one or more drug substances dissolved in a suitable solvent or mixture of mutually miscible solvents that is suitable for injection.	C42945	INJECTION, SOLUTION
C42899	injection, solution, concentrate	A sterile preparation for parenteral use which, upon the addition of suitable solvents, yields a solution conforming in all respects to the requirements for Injections.	C42899	INJECTION, SOLUTION, CONCENTRATE
C42995	injection, suspension	A liquid preparation, suitable for injection, which consists of solid particles dispersed throughout a liquid phase in which the particles are not soluble. It can also consist of an oil phase dispersed throughout an aqueous phase, or vice-versa.	C42995	INJECTION, SUSPENSION

C42926	injection, suspension, extended release	A sterile preparation intended for parenteral use which has been formulated in a manner to allow at least a reduction in dosing frequency as compared to that drug presented as a conventional dosage form (e.g., as a solution or a prompt drug-releasing, conventional solid dosage form).	C42926	INJECTION, SUSPENSION, EXTENDED RELEASE
C42951	injection, suspension, liposomal	A liquid parenteral pharmaceutical dosage form structured as a multilamellar composition of concentric phospholipid spheres that encapsulate the drug (drug delivery systems) separated by layers of water. Drug release is facilitated and controlled by in vivo erosion of the liposomes. To further increase the in vivo circulation time, liposomes in some preparations are covalently derivatized with PEG to produce PEGylated or stealth liposomes. Covalent attachment of drugs to the outer surface of liposomes can potentially serve as a delayed-release product.	C42951	INJECTION, SUSPENSION, LIPOSOMAL
C42988	injection, suspension, sonicated	A liquid preparation, suitable for injection, which consists of solid particles dispersed throughout a liquid phase in which the particles are not soluble. In addition, the product is sonicated while a gas is bubbled through the suspension, and this results in the formation of microspheres by the solid particles.	C42988	INJECTION, SUSPENSION, SONICATED
C60933	insert	A specially formulated and shaped non-encapsulated solid preparation intended to be placed into a non-rectal orifice of the body, where drug is released, generally for localized effects.	C60933	INSERT
C42922	insert, extended release	A specially formulated and shaped non-encapsulated solid preparation intended to be placed into a non-rectal orifice of the body, where the medication is released, generally for localized effects; the extended release preparation is designed to allow for a reduction in dosing frequency.	C42922	INSERT, EXTENDED RELEASE
158	instant herbal tea		C42975	POWDER, FOR SOLUTION
159	intestinal gel	Gel suitable for administration to the intestine.	C42934	GEL
160	intramammary emulsion	Sterile preparations in form of an emulsion, intended for introduction into the mammary gland via the teat canal.	C42913	EMULSION
161	intramammary infusion,	Sterile preparations in form of an infusion, intended for introduction into the mammary gland via the teat canal.	C43002	UNASSIGNED
162	intramammary ointment	Sterile preparations in form of an ointment, intended for introduction into the mammary gland via the teat canal.	C42966	OINTMENT
163	intramammary solution	Sterile preparations in form of an solutionn, intended for introduction into the mammary gland via the teat canal.	C42986	SOLUTION
164	intramammary suspension	Sterile preparations in form of an suspension, intended for introduction into the mammary gland via the teat canal.	C42994	SUSPENSION
165	intraruminal device	Solid preparations each containing one or more active substances. They are intended for oral administration to ruminant animals and are designed to be retained in the rumen to deliver the active substance(s) in a continuous or pulsatile manner.	C17423	DRUG DELIVERY SYSTEM
166	intrauterine capsule	Soft capsule intended for intrauterine use	C25158	CAPSULE

167	intrauterine delivery system	Drug delivery system intended to be inserted into the uterus where it releases its contents over an extended period of time.	C17423	DRUG DELIVERY SYSTEM
C47915	intrauterine device	A device inserted and left in the uterus to prevent effective conception.	C47915	INTRAUTERINE DEVICE
168	intrauterine emulsion	Emulsion suitable for intrauterine use.	C42913	EMULSION
169	intrauterine liquid	Liquid suitable for intrauterine use.	C42953	LIQUID
170	intrauterine solution	Solution suitable for intrauterine use.	C42986	SOLUTION
171	intrauterine suspension	Suspension suitable for intrauterine use.	C42994	SUSPENSION
172	intrauterine tablet	Tablet suitable for intrauterine use.	C42998	TABLET
173	intravenous infusion	Infusion suitable for intravenous use.	C42946	INJECTION
C42947	irrigant	A sterile solution intended to bathe or flush open wounds or body cavities; they're used topically, never parenterally.	C42947	IRRIGANT
174	irrigation solution	Sterile, aqueous large volume preparations intended to be used for irrigation of body cavities, wounds and surfaces, for example during surgical procedures.	C42986	SOLUTION
C42948	jelly	A class of gels--semisolid systems which consist of suspensions made up of either small inorganic particles or large organic molecules interpenetrated by a liquid--in which the structural coherent matrix contains a high portion of liquid, usually water.	C42948	JELLY
C47916	kit	A packaged collection of related material.	C47916	KIT
175	kit for radiopharmaceutical preparation	A preparation to be reconstituted or combined with radionuclides in the final radiopharmaceutical usually prior to its administration. The word radiopharmaceutical may be omitted if there is no ambiguity on the radiopharmaceutical nature of the product. Combinations with other standard terms are not recommended.	C47916	KIT
176	lick block	Solid block formed by pressing. Administration takes place when the animal is licking the block.	C42891	BLOCK
C45413	liner, dental	Material applied to the dental tissue or to the tissue side of a denture to provide biological, chemical and physical protection. Cavity liners applied to the inside of the dental cavity are specially formulated for use with adhesives; they desensitize dentin and insulate the surface. Soft dental liners are applied to the tissue side of a denture to provide a soft lining to the parts of a denture coming into contact with soft tissue. It cushions the contact of the denture with the tissues.	C45413	LINER, DENTAL
C42949	liniment	A solution or mixture of various substances in oil, alcoholic solutions of soap, or emulsions intended for external application.	C42949	LINIMENT
C42952	lipstick	A waxy solid, usually colored cosmetic, in stick form for the lips.	C42952	LIPSTICK
C42953	liquid	A dosage form consisting of a pure chemical in its liquid state. This dosage form term should not be applied to solutions. Note: A liquid is pourable; it flows and conforms to its container at room temperature. It displays Newtonian or pseudoplastic flow behavior.	C42953	LIQUID
C60934	liquid, extended release	A liquid that delivers a drug in such a manner to allow a reduction in dosing frequency as compared to that drug (or drugs) presented as a conventional dosage form.	C60934	LIQUID, EXTENDED RELEASE

177	living tissue equivalent	Cultured living tissue used for the reconstruction of parts of the body; the appropriate tissue such as epidermis dermis cartilage or muscle will need to be stated	C43002	UNASSIGNED
C29167	lotion	A liquid preparation for bathing the skin, or an injured or diseased part, either for a medicinal purpose, or for improving its appearance.	C29167	LOTION
C60957	lotion, augmented	A lotion dosage form that enhances drug delivery. Augmentation does not refer to the strength of the drug in the dosage form. NOTE: CDER has decided to refrain from expanding the use of this dosage form due to difficulties in setting specific criteria that must be met to be considered augmented.	C60957	LOTION, AUGMENTED
C60958	lotion/shampoo	A lotion dosage form which has a soap or detergent that is usually used to clean the hair and scalp; it is often used as a vehicle for dermatologic agents.	C60958	LOTION/SHAMPOO
C42955	lozenge	Flat, round solid dosage form containing one or more medications, flavouring, sugar or another sweetener, and mucilage. Lozenge dissolves in the mouth to release the drug(s). The medication from a lozenge goes directly into the circulation without passing through the stomach first.	C42955	LOZENGE
178	lyophilisate for solution for infusion	Freeze-dried preparation to be dissolved in a suitable solvent before administration by infusion.	C42957	INJECTION, POWDER, LYOPHILIZED, FOR SOLUTION
179	lyophilisate for solution for injection	Freeze-dried preparation to be dissolved in a suitable solvent before administration by injection.	C42957	INJECTION, POWDER, LYOPHILIZED, FOR SOLUTION
180	lyophilisate for suspension	Freeze-dried preparation to be dissolved in a suitable solvent before administration.	C42958	INJECTION, POWDER, LYOPHILIZED, FOR SUSPENSION
181	lyophilisate for suspension for injection	Freeze-dried preparation to be dispersed in a suitable solvent before administration by injection.	C42958	INJECTION, POWDER, LYOPHILIZED, FOR SUSPENSION
182	lyophilised pellet for reconstitution	Pellet obtained by free-drying (lyophilisation), intended to be dispersed/dissolved in water before use.	C42969	PELLET
183	medicated pellets	Large granules mainly formed by extrusion.	C42969	PELLET
184	medicated pendant	Matrix impregnated with active substance(s) which is fixed on a device to be worn for example round the animal neck.	C87542	Pendant
185	medicated premix	Mixtures of one or more active substances, usually in suitable bases, that are prepared to facilitate feeding the active substances to animals. They are used exclusively in the preparation of medicated feeding stuffs.	C43002	UNASSIGNED
186	medicated sponge	Replaces cutaneous sponge and vaginal sponge. Sponge impregnated with an active substance or active substances. Different routes of administration are possible.	C47912	SPONGE
187	medicated thread	A fine strand of suture material, impregnated with active substance.	C60926	FIBER, EXTENDED RELEASE
188	medicated vaginal tampon	Solid, single-dose preparations intended to be inserted into the vaginal cavity for a limited period of time. They consist of a suitable material such as cellulose, collagen or silicone impregnated with one or more active substances.	C47892	TAMPON
189	medicinal gas, compressed	A gas packaged under pressure which is entirely gaseous at - 50 °C	C42933	GAS

190	medicinal gas, cryogenic	a gas which liquifies at 1.013 bar at a temperature below -150 °C.	C42933	GAS
191	medicinal gas, liquefied	A gas packaged under pressure which is partially liquid (gas over liquid) at -50 °C.	C42933	GAS
192	modified-release capsule, hard	For use only when gastro-resistant capsule hard or prolonged release capsule hard do not apply.	C43002	UNASSIGNED
193	modified-release capsule, soft	For use only when gastro-resistant capsule soft or prolonged release capsule soft do not apply.	C43002	UNASSIGNED
194	modified-release film-coated tablet	Coated tablets which contain special excipients or which are prepared by special procedures, or both, designed to modify the rate, the place or the time at which the active substance(s) are released.	C43002	UNASSIGNED
195	modified-release granules	For use only when gastro-resistant granules or prolonged release granules do not apply.	C43002	UNASSIGNED
196	modified-release granules for oral suspension	Coated or uncoated granules which contain special excipients or which are prepared by special procedures, or both, designed to modify the rate, the place or the time at which the active substance or substances are released, to be dispersed in a liquid to produce a suspension for oral use.	C43002	UNASSIGNED
197	modified-release tablet	For use only when gastro-resistant tablet or prolonged release tablet do not apply	C43002	UNASSIGNED
C29269	mouthwash	An aqueous solution which is most often used for its deodorant, refreshing, or antiseptic effect.	C29269	MOUTHWASH
199	muco-adhesive buccal tablet	Tablet containing one or more active substances intended for systemic absorption through the buccal mucosa over a prolonged period of time.	C42927	TABLET, EXTENDED RELEASE
200	nasal cream	Cream intended for application into the nasal cavities.	C28944	CREAM
201	nasal drops	Solutions, emulsions or suspensions intended for instillation into the nasal cavities.	C60992	SOLUTION/ DROPS
202	nasal drops, emulsion	Emulsions intended for instillation into the nasal cavities.	C42913	EMULSION
203	nasal drops, solution	Solutions intended for instillation into the nasal cavities.	C42986	SOLUTION
204	nasal drops, suspension	Suspensions intended for instillation into the nasal cavities.	C42994	SUSPENSION
205	nasal gel	Gel intended for application into the nasal cavities.	C42934	GEL
206	nasal ointment	Ointments intended for application into the nasal cavities.	C42966	OINTMENT
207	nasal powder	Powders intended for insufflation into the nasal cavity by means of a suitable device.	C42972	POWDER
208	nasal spray	Solutions, emulsions or suspensions intended for spraying into the nasal cavities.	C42989	SPRAY
209	nasal spray and oromucosal solution	Spray for application to the nasal cavities and solution for application to the oral cavity.	C42986	SOLUTION
210	nasal spray, emulsion	Emulsions intended for spraying into the nasal cavities.	C42913	EMULSION
211	nasal spray, solution	Solutions intended for spraying into the nasal cavities.	C42986	SOLUTION
212	nasal spray, suspension	Suspensions intended for spraying into the nasal cavities.	C42994	SUSPENSION
213	nasal stick	Stick intended for nasal use.	C42991	STICK
214	nasal wash	Aqueous isotonic solutions intended to cleanse the nasal cavities.	C42986	SOLUTION
215	nebulisation solution	Solution of active substance (s) intended to be converted by nebulisers into an aerosol for mass medication. For products intended for the treatment of individual animals see under Preparations for inhalation.	C42986	SOLUTION

216	nebuliser emulsion	Emulsion intended to be used with a neulizer (device that converts aqueous solutions containing medications into fine±10 µm in diameter droplets, which is small enough to pass directly to the alveoli).	C42913	EMULSION
217	nebuliser liquid	Liquid intended to be used with a neulizer (device that converts aqueous solutions containing medications into fine±10 µm in diameter droplets, which is small enough to pass directly to the alveoli).	C42953	LIQUID
218	nebuliser solution	Solution intended to be used with a neulizer (device that converts aqueous solutions containing medications into fine±10 µm in diameter droplets, which is small enough to pass directly to the alveoli).	C42986	SOLUTION
219	nebuliser suspension	Suspension intended to be used with a neulizer (device that converts aqueous solutions containing medications into fine±10 µm in diameter droplets, which is small enough to pass directly to the alveoli).	C42994	SUSPENSION
C42965	oil	An unctuous, combustible substance which is liquid, or easily liquefiable, on warming, and is soluble in ether but insoluble in water. Such substances, depending on their origin, are classified as animal, mineral, or vegetable oils.	C42965	OIL
C42966	ointment	A suspension or emulsion, semisolid (1) dosage form, usually containing < 20% water and volatiles (2) and > 50% hydrocarbons, waxes, or polyols as the vehicle. This dosage form is generally for external application to the skin or mucous membranes. Note 1: A semisolid is not pourable; it does not flow or conform to its container at room temperature. It does not flow at low shear stress and generally exhibits plastic flow behavior. Note 2: Percent water and volatiles are measured by a loss on drying test in which the sample is heated at 105 degrees C until constant weight is achieved.	C42966	OINTMENT
C60984	ointment, augmented	An ointment dosage form that enhances drug delivery. Augmentation does not refer to the strength of the drug in the dosage form. NOTE: CDER has decided to refrain from expanding the use of this dosage form due to difficulties in setting specific criteria that must be met to be considered augmented.	C60984	OINTMENT, AUGMENTED
220	oral drops	Solutions, emulsions or suspensions which are administered in small volumes such as drops by the means of a suitable device.	C60992	SOLUTION/ DROPS
221	oral drops, emulsion	Emulsions which are administered in small volumes such as drops by the means of a suitable device.	C42913	EMULSION
222	oral drops, powder for suspension	Powder to be sdispersed in an appropriate liquid vehicle to produce a suspension in form of drops, for oral use.	C42975	POWDER, FOR SUSPENSION
223	oral drops, solution	Solutions which are administered in small volumes such as drops by the means of a suitable device.	C60992	SOLUTION/ DROPS
224	oral drops, suspension	Suspensions which are administered in small volumes such as drops by the means of a suitable device.	C60995	SUSPENSION/DROPS
225	oral emulsion	Emulsion suitable for oral use.	C42913	EMULSION

226	oral gel	Gel to be swallowed after administration to the oral cavity.	C42934	GEL
227	oral gum	Preparation with a gum-like consistency to be sucked or chewed before being swallowed. Medicated chewing-gum is excluded.	C42941	GUM
228	oral liquid	Liquid supplied in single-dose or multi-dose containers, suitable for oral use.	C42953	LIQUID
229	oral lyophilisate	Freeze dried fast releasing preparation to be placed on the tongue or alternatively to be dissolved in water before administration.	C87541	POWDER, LYOPHILIZED
230	oral paste	Paste to be swallowed after administration to the oral cavity.	C42967	PASTE
231	oral powder	Preparations consisting of solid, loose, dry particles of varying degrees of fineness. They contain one or more active substances, with or without excipients and, if necessary, colouring matter authorised by the competent authority and flavouring substances. They are generally administered in or with water or another suitable liquid. They may also be swallowed directly.	C42972	POWDER
232	oral solution	Solution supplied in single-dose or multi-dose containers, suitable for oral use.	C42986	SOLUTION
233	oral suspension	Suspension supplied in single-dose or multi-dose containers, suitable for oral use.	C42994	SUSPENSION
234	oral suspension for use in drinking water	Suspension intended to be diluted in drinking water, for oral use.	C42994	SUSPENSION
235	oral/rectal suspension	Suspension supplied in single-dose or multi-dose containers, suitable for oral/rectal use.	C42994	SUSPENSION
236	orodispersible tablet	Tablet to be placed in the mouth where it disperses rapidly before being swallowed.	C42998	TABLET
237	oromucosal capsule	Soft capsules to be chewed or sucked.	C25158	CAPSULE
238	oromucosal cream	Cream intended for administration to the oral cavity or to a specific part of the oral cavity such as the gingivae.	C28944	CREAM
239	oromucosal drops	Drops intended for local or systemic effect. They are applied by instillation into the oral cavity or onto a specific part of the oral cavity.	C60992	SOLUTION/ DROPS
240	oromucosal gel	Gingival gel is excluded. Gel intended for application to the oral cavity by means of a suitable applicator.	C42934	GEL
241	oromucosal liquid	Liquid preparations intended for administration to the oral cavity by means of a suitable applicator.	C42953	LIQUID
242	oromucosal paste	Gingival paste is excluded. Gel intended for administration to the oral cavity by means of a suitable applicator.	C42967	PASTE
243	oromucosal patch	Patch intended to be used in the oral cavity.	C42968	PATCH
244	oromucosal solution	Liquid preparations intended for administration to the oral cavity by means of a suitable applicator.	C42986	SOLUTION
245	oromucosal spray	Sublingual spray is excluded. sprays intended for local or systemic effect. They are applied by spraying into the oral cavity or onto a specific part of the oral cavity.	C42989	SPRAY
246	oromucosal suspension	Liquid preparations intended for administration to the oral cavity by means of a suitable applicator.	C42994	SUSPENSION
247	oromucosal/laryngopharyngeal solution/spray	Solutions, emulsions or suspensions intended for local or systemic effect. They are applied by instillation or spraying into the oral cavity or onto a specific part of the oral cavity such as spraying under the tongue or into the throat (oropharyngeal spray).	C43002	UNASSIGNED

C47887	packing	Packing used in medical and dental practice for filling a natural cavity or deep or tunneled wound, covered or impregnated with pharmaceutical product to promote healing, produce antibacterial, or local anesthetic effect.	C47887	PACKING
248	pad	A more or less encapsulated body of fat or some other tissue serving to fill a space or act as a cushion in the body.	C60884	CLOTH
C42967	paste	A semisolid dosage form, containing a large proportion (20 - 50%) of solids finely dispersed in a fatty vehicle. This dosage form is generally for external application to the skin or mucous membranes. Note: A semisolid is not pourable; it does not flow or conform to its container at room temperature. It does not flow at low shear stress and generally exhibits plastic flow behavior.	C42967	PASTE
C42907	paste, dentifrice	A paste formulation intended to clean and/or polish the teeth, and which may contain certain additional agents.	C42907	PASTE, DENTIFRICE
C60985	pastille	An aromatic preparation, often with a pleasing flavor, usually intended to dissolve in the mouth.	C60985	PASTILLE
C42968	patch	A drug delivery system that often contains an adhesive backing that is usually applied to an external site on the body. Its ingredients either passively diffuse from, or are actively transported from, some portion of the patch. Depending upon the patch, the ingredients are either delivered to the outer surface of the body or into the body. A patch is sometimes synonymous with the terms Extended Release Film and System.	C42968	PATCH
C42923	patch, extended release	A drug delivery system in the form of a patch that releases the drug in such a manner that a reduction in dosing frequency compared to that drug presented as a conventional dosage form (e.g., a solution or a prompt drug-releasing, conventional solid dosage form).	C42923	PATCH, EXTENDED RELEASE
C42911	patch, extended release, electrically controlled	A drug delivery system in the form of a patch which is controlled by an electric current that releases the drug in such a manner that a reduction in dosing frequency compared to that drug presented as a conventional dosage form (e.g., a solution or a prompt drug-releasing, conventional solid dosage form).	C42911	PATCH, EXTENDED RELEASE, ELECTRICALLY CONTROLLED
C42969	pellet	A small sterile solid mass consisting of a highly purified drug (with or without excipients) made by the formation of granules, or by compression and molding.	C42969	PELLET
C42943	pellet, implantable	A small sterile solid mass consisting of a highly purified drug (with or without excipients) made by the formation of granules, or by compression and molding; they are intended for implantation in the body (usually subcutaneously) for the purpose of providing continuous release of the drug over long periods of time.	C42943	PELLET, IMPLANTABLE
C42918	pellets, coated, extended release	A solid dosage form in which the drug itself is in the form of granules to which varying amounts of coating have been applied, and which releases a drug (or drugs) in such a manner to allow a reduction in dosing frequency as compared to that drug (or drugs) presented as a conventional dosage form	C42918	PELLETS, COATED, EXTENDED RELEASE

249	periodontal gel	Gel to be placed in the pouch between the tooth and the gingiva.	C42934	GEL
250	periodontal insert	Medicated insert to be placed between the gingiva and the tooth (within the tooth socket/periodontal membrane).	C60933	INSERT
251	periodontal powder	Powder suitable for periodontal use.	C42972	POWDER
252	pessary	Moulded pessary	C43002	UNASSIGNED
C25394	pill	A dose of medicine in the form of a small pellet.	C25394	PILL
253	pillules, single-dose container	Little pill that holds a quantity of drug intended as a single dose.	C25394	PILL
C42970	plaster	Substance intended for external application made of such materials and of such consistency as to adhere to the skin and attach to a dressing; plasters are intended to afford protection and support and/or to furnish an occlusion and macerating action and to bring medication into close contact with the skin.	C42970	PLASTER
254	plaster for provocation test	Allergen product for provocation test.	C42970	PLASTER
C47913	poultice	A soft, moist mass of meal, herbs, seed, etc., usually applied hot in cloth that consists of gruel-like consistency.	C47913	POULTICE
255	pour-on	Pour-on preparations contain one or more active substances for the prevention and treatment of ectoparasitic and/or endoparasitic infestations of animals. They are applied in volumes which are usually greater than 5 ml by pouring along the animal's dorsal midline.	C42986	SOLUTION
256	pour-on emulsion	Emulsion containing one or more active substances for the prevention and treatment of ectoparasitic and/or endoparasitic infestations of animals. They are applied in volumes which are usually greater than 5 ml by pouring along the animal's dorsal midline.	C42913	EMULSION
257	pour-on solution	Solution containing one or more active substances for the prevention and treatment of ectoparasitic and/or endoparasitic infestations of animals. They are applied in volumes which are usually greater than 5 ml by pouring along the animal's dorsal midline.	C42986	SOLUTION
258	pour-on suspension	Suspension containing one or more active substances for the prevention and treatment of ectoparasitic and/or endoparasitic infestations of animals. They are applied in volumes which are usually greater than 5 ml by pouring along the animal's dorsal midline.	C42994	SUSPENSION
C42972	powder	An intimate mixture of dry, finely divided drugs and/or chemicals that may be intended for internal or external use.	C42972	POWDER
259	powder and solvent for concentrate for solution for infusion	Powder to be dissolved in solvent to produce a concentrate for solution for infusion.	C42975	POWDER, FOR SOLUTION
260	powder and solvent for cutaneous solution	Preparations consisting of solid, loose, dry particles of varying degrees of fineness, to be diluted in its solvent to produce a solution to be applied to the skin.	C42975	POWDER, FOR SOLUTION
261	powder and solvent for dental gel	Powder to be mixed with solvent to produce a gel suitable for dental application.	C42972	POWDER
262	powder and solvent for emulsion for injection	Powder to be emulsifying in solvent to obtain an emulsion suitable for injection.	C42972	POWDER
263	powder and solvent for endocervical gel	Powder to be mixed with solvent.	C42972	POWDER
264	powder and solvent for endosinusal solution	Powder to be dissolved in solvent to produce a solution suitable for endosinusal use.	C42973	POWDER, FOR SOLUTION

265	powder and solvent for gingival gel	Powder to be dilute in solvent to producec a gel intended for administration to the gingivae by means of a suitable applicator.	C42972	POWDER
266	powder and solvent for instillation solution for intraocular use	Powder to be dissolved in solvent to produce a solution suitable for intraocular instillation.	C42973	POWDER, FOR SOLUTION
267	powder and solvent for oral solution	Powder to be dissolved in solvent to produce a solution for oral use.	C42973	POWDER, FOR SOLUTION
268	powder and solvent for oral suspension	Powder to be dispersed in solvent to produce a suspension for oral use.	C42975	POWDER, FOR SUSPENSION
269	powder and solvent for prolonged-release suspension for injection	Powder to be dispersed in solvent to produce an emulsion.	C42975	POWDER, FOR SUSPENSION
270	powder and solvent for sealant	Powder to be diluted in solvent to produce sealant.	C42972	POWDER
271	powder and solvent for solution for infusion	Solid, sterile substances distributed in their final containers and which, when shaken with the prescribed volume of solvent, rapidly form clear and practically particle-free solutions. After dissolution, they comply with the requirements for injections.	C42973	POWDER, FOR SOLUTION
272	powder and solvent for solution for injection	Solid, sterile substances distributed in their final containers and which, when shaken with the prescribed volume of solvent, rapidly form clear and practically particle-free solutions. After dissolution, they comply with the requirements for injections.	C42973	POWDER, FOR SOLUTION
273	powder and solvent for solution for injection/infusion	Solid, sterile substances distributed in their final containers and which, when shaken with the prescribed volume of solvent, rapidly form clear and practically particle-free solutions. After dissolution, they comply with the requirements for injections or for infusions.	C42973	POWDER, FOR SOLUTION
274	powder and solvent for suspension for injection	Solid, sterile substances distributed in their final containers and which, when shaken with the prescribed volume of solvent, rapidly form uniform suspensions. After suspension, they comply with the requirements for injections.	C42975	POWDER, FOR SUSPENSION
275	powder and solvent for suspension for nasal administration	Powder to be dispersed in solvent to produce a suspension intended for application in nasal cavities.	C42975	POWDER, FOR SUSPENSION
276	powder for bladder irrigation	Powder to be diluted in an appropriate liquid vehicle to be use for bladder irrigation.	C42972	POWDER
277	powder for concentrate for solution for infusion	powder used to produce a concentrate to be diluted to create a solution for infusion (solution obtained by steeping or soaking a substance).	C42973	POWDER, FOR SOLUTION
278	powder for dip solution	Powder to be dissolved in an appropriate liquid vehicle to produce a solution for dip.	C42973	POWDER, FOR SOLUTION
279	powder for infusion	Solid, sterile substances distributed in their final containers and which, when shaken with the prescribed volume of a prescribed sterile liquid, rapidly form either clear and practically particle-free solutions or uniform suspensions, complying with the requirements for infusions.	C42975	POWDER, FOR SUSPENSION
280	powder for injection	Solid, sterile substances distributed in their final containers and which, when shaken with the prescribed volume of a prescribed sterile liquid, rapidly form either clear and practically particle-free solutions or uniform suspensions, complying with the requirements for injections.	C42972	POWDER
281	powder for intravesical solution	Powder to be dissolved in an appropriate liquid vehicle to produce a solution for intravesical use.	C42973	POWDER, FOR SOLUTION

282	powder for intravesical suspension	Powder to be dispersed in an appropriate liquid vehicle to produce a suspension for intravesical use.	C42975	POWDER, FOR SUSPENSION
283	powder for mouth wash	Powder to be diluted in water to produce aqueous solutions intended for use in contact with the mucous membrane of the oral cavity.	C42973	POWDER, FOR SOLUTION
284	powder for nebuliser solution	Powder to be dissolved in an appropriate liquid vehicle to produce a solution suitable for nebulisation.	C42973	POWDER, FOR SOLUTION
285	powder for nebuliser suspension	powder to be dispersed in an appropriate liquid vehicle to produce a suspension suitable for nebulisation	C42975	POWDER, FOR SUSPENSION
286	powder for oral solution	Powder to be dissolved in an appropriate liquid vehicle to produce a solution for oral use.	C42973	POWDER, FOR SOLUTION
287	powder for oral suspension	Powder to be dispersed in an appropriate liquid vehicle to produce a suspension for oral use.	C42975	POWDER, FOR SUSPENSION
288	powder for oral/rectal suspension	Single-dose preparations which are dispersed in water at the time of administration, to produce oral or rectal suspension.	C42975	POWDER, FOR SUSPENSION
289	powder for rectal solution	Single-dose preparations which are dissolved in water at the time of administration, to produce rectal solution.	C42973	POWDER, FOR SOLUTION
290	powder for rectal suspension	Single-dose preparations which are dispersed in water at the time of administration, to produce rectal suspension.	C42975	POWDER, FOR SUSPENSION
291	powder for solution for infusion	Solid, sterile substances distributed in their final containers and which, when shaken with the prescribed volume of a prescribed sterile liquid, rapidly form clear and practically particle-free solutions. After dissolution, they comply with the requirements for infusions.	C42973	POWDER, FOR SOLUTION
292	powder for solution for injection	Solid, sterile substances distributed in their final containers and which, when shaken with the prescribed volume of a prescribed sterile liquid, rapidly form clear and practically particle free solutions. After dissolution, they comply with the requirements for injections	C42973	POWDER, FOR SOLUTION
293	powder for solution for injection or infusion	Solid, sterile substances distributed in their final containers and which, when shaken with the prescribed volume of a prescribed sterile liquid, rapidly form clear and practically particle free solutions. After dissolution, they comply with the requirements for injections or for infusions.	C42973	POWDER, FOR SOLUTION
294	powder for solution for intraocular irrigation	Powder to be dissolved with an appropriate liquid vehicle to produce a solution for intraocular irrigation.	C42973	POWDER, FOR SOLUTION
295	powder for solution for intravesical use	Powder to be dissolved with an appropriate liquid vehicle to produce a solution for intravesical use.	C42973	POWDER, FOR SOLUTION
296	powder for solution for nasal spray	Powder to be dissolved with an appropriate liquid vehicle to produce a solution to be sprayed into the nasal cavities.	C42973	POWDER, FOR SOLUTION
297	powder for suspension extended release	Powder to be dispersed in an appropriate liquid vehicle to produce a suspension showing a slower release of the active substance(s) than that of a conventional-release suspension administered by the same route.	C42975	POWDER, FOR SUSPENSION
298	powder for suspension for fish treatment	Powder to be used to produce a suspension intended for the treatment of fish by immersion.	C42975	POWDER, FOR SUSPENSION

299	powder for suspension for injection	Solid, sterile substances distributed in their final containers and which, when shaken with the prescribed volume of a prescribed sterile liquid, rapidly form uniform suspensions. After suspension, they comply with the requirements for injections.	C42975	POWDER, FOR SUSPENSION
300	powder for syrup	Powder to be diluted to obtain aqueous preparations characterised by sweet taste and a viscous consistency.	C42972	POWDER
301	powder for use in drinking water	Powder to be diluted in drinking water.	C42972	POWDER
C42908	powder, dentifrice	A powder formulation intended to clean and/or polish the teeth, and which may contain certain additional agents.	C42908	POWDER, DENTIFRICE
C42973	powder, for solution	An intimate mixture of dry, finely divided drugs and/or chemicals, which, upon the addition of suitable vehicles, yields a solution.	C42973	POWDER, FOR SOLUTION
C42975	powder, for suspension	An intimate mixture of dry, finely divided drugs and/or chemicals, which, upon the addition of suitable vehicles, yields a suspension (a liquid preparation containing the solid particles dispersed in the liquid vehicle).	C42975	POWDER, FOR SUSPENSION
C42961	powder, metered	A powder dosage form that is situated inside a container that has a mechanism to deliver a specified quantity.	C42961	POWDER, METERED
302	premix for medicated feeding stuff	Mixtures of one or more active substances, usually in suitable bases, that are prepared to facilitate feeding the active substances to animals. They are used exclusively in the preparation of medicated feeding stuffs.		
303	pressurised inhalation	Solutions, suspensions or emulsions supplied in special containers which are held under pressure with suitable propellants or suitable mixtures of liquefied propellants, which can act also as solvents. Suitable co-solvents, solubilisers and stabilisers may be added.	C42887	AEROSOL
304	pressurised inhalation, emulsion	Emulsions supplied in special containers which are held under pressure with suitable propellants or suitable mixtures of liquefied propellants, which can act also as solvents. Suitable co-solvents, solubilisers and stabilisers may be added.	C42887	AEROSOL
305	pressurised inhalation, solution	Solutions supplied in special containers which are held under pressure with suitable propellants or suitable mixtures of liquefied propellants, which can act also as solvents. Suitable co-solvents, solubilisers and stabilisers may be added.	C42887	AEROSOL
306	pressurised inhalation, suspension	Suspensions supplied in special containers which are held under pressure with suitable propellants or suitable mixtures of liquefied propellants, which can act also as solvents. Suitable co-solvents, solubilisers and stabilisers may be added.	C42887	AEROSOL
307	prolonged-release capsule	Hard or soft capsules in which the contents or the shell or both contain special excipients or are prepared by a special process designed to prolong the active substance release.	C42916	CAPSULE, EXTENDED RELEASE
308	prolonged-release capsule, hard	Hard capsules in which the contents or the shell or both contain special excipients or are prepared by a special process designed to prolong the active substance release.	C42916	CAPSULE, EXTENDED RELEASE
309	prolonged-release capsule, soft	Soft capsules in which the contents or the shell or both contain special excipients or are prepared by a special process designed to prolong the active substance release.	C42916	CAPSULE, EXTENDED RELEASE

310	prolonged-release granules	Modified-release granules showing a slower release of the active substance(s) than that of a conventional-release granules administered by the same route.	C69067	GRANULE, EXTENDED RELEASE
311	prolonged-release granules for oral suspension	Modified-release granules showing a slower release of the active substance(s) than that of a conventional-release granules administered by the same route, to be dispersed in an appropriate liquid vehicle to produce a solution suitable for oral use.	C42921	GRANULE, FOR SUSPENSION, EXTENDED RELEASE
312	prolonged-release tablet	Coated or uncoated tablets which contain special excipients or which are prepared by special procedures, or both, designed to prolong the release of active substance(s).	C42927	TABLET, EXTENDED RELEASE
313	pulsatile-release intraruminal device	Solid preparations each containing one or more active substances. They are intended for oral administration to ruminant animals and are designed to be retained in the rumen to deliver the active substance(s) in a pulsatile manner (sequential release of the active substance).	C17423	DRUG DELIVERY SYSTEM
314	radionuclide generator	A system incorporating a fixed parent radionuclide from which is produced a daughter radionuclide which is to be removed by elution or by any other method and used in a radiopharmaceutical.	C48193	GENERATOR
315	radiopharmaceutical precursor	A radionuclide produced for the radio-labelling of another substance prior to administration.	C43002	UNASSIGNED
316	rectal capsule	Soft capsule	C25158	CAPSULE
317	rectal cream	Cream to be applied to the rectal mucosis.	C28944	CREAM
318	rectal emulsion	Emulsion intended for rectal use in order to obtain a systemic or local effect, or they may be intended for diagnostic purposes.	C42913	EMULSION
319	rectal foam	Foam to be applied to the rectal mucosis.	C42888	AEROSOL, FOAM
320	rectal gel	Gel to be applied to the rectal mucosis.	C42934	GEL
321	rectal ointment	Ointment to be applied to the rectal mucosis.	C42966	OINTMENT
322	rectal solution	Solution intended for rectal use in order to obtain a systemic or local effect, or they may be intended for diagnostic purposes.	C42986	SOLUTION
323	rectal suspension	Suspension intended for rectal use in order to obtain a systemic or local effect, or they may be intended for diagnostic purposes.	C42994	SUSPENSION
324	rectal tampon	Solid, single-dose preparations intended to be inserted into the lower part of the rectum for a limited time.	C47892	TAMPON
C60988	ring	A small circular object with a vacant circular center that is usually intended to be placed in the body by special inserters, where the medication is released, generally for localized effects.	C60988	RING
C42979	rinse	A liquid used to cleanse by flushing.	C42979	RINSE
C42980	salve	A thick ointment or cerate (a fat or wax based preparation with a consistency between an ointment and a plaster).	C42980	SALVE
325	sealant	Tissue glue.	C45414	CEMENT
C42981	shampoo	A liquid soap or detergent used to clean the hair and scalp and is often used as a vehicle for dermatologic agents.	C42981	SHAMPOO
C42982	shampoo, suspension	A liquid soap or detergent containing one or more solid, insoluble substances dispersed in a liquid vehicle that is used to clean the hair and scalp and is often used as a vehicle for dermatologic agents.	C42982	SHAMPOO, SUSPENSION

C42983	soap	Any compound of one or more fatty acids, or their equivalents, with an alkali; soap is detergent and is much employed in liniments, enemas, and in making pills. It is also a mild aperient, antacid and antiseptic.	C42983	SOAP
C42986	solution	A clear, homogeneous liquid dosage form that contains one or more chemical substances dissolved in a solvent or mixture of mutually miscible solvents. Note: A liquid is pourable; it flows and conforms to its container at room temperature. It displays Newtonian or pseudoplastic flow behavior.	C42986	SOLUTION
326	solution for haemodiafiltration	Solution used as a replacement fluid to be added to the blood in case of haemodiafiltration.	C42986	SOLUTION
327	solution for haemodialysis	Solution used as a replacement fluid to be added to the blood in case of haemodialysis.	C42986	SOLUTION
328	solution for haemodialysis/haemofiltration	Solution used as a replacement fluid to be added to the blood in case of haemodialysis/haemodiafiltration.	C42986	SOLUTION
329	solution for haemofiltration	Solution used as a replacement fluid to be added to the blood in case haemofiltration.	C42986	SOLUTION
330	solution for infusion	Solution complying with the requirements for infusions.	C42986	SOLUTION
331	solution for infusion and oral solution	Solution complying with the requirements for infusions and oral uses.	C42986	SOLUTION
332	solution for injection	Solution complying with the requirements for injections.	C42986	SOLUTION
333	solution for injection/infusion	Solution complying with the requirements for injections/infusions.	C42986	SOLUTION
334	solution for intraperitoneal use	Solution complying with the requirements for intraperitoneal use.	C42986	SOLUTION
335	solution for intravesical use	Bladder irrigation is excluded.	C42986	SOLUTION
336	solution for iontophoresis	Solution intended to be propeeling in high concentrations transdermally by repulsive electromotive force using a small electrical charge applied to an iontophoretic chamber containing a similarly charged active agent and its vehicle.	C42986	SOLUTION
337	solution for organ preservation	Solution in which organs are preserved and maintained while they are out of the body between procurement and transplant	C42986	SOLUTION
338	solution for provocation test	Allergen product for provocation test by the nasal ocular or bronchial routes.	C42986	SOLUTION
339	solution for skin-prick test	Allergen product for diagnostic use.	C42986	SOLUTION
340	solution for skin-scratch test	Allergen products for diagnostic use.	C42986	SOLUTION
C42898	solution, concentrate	A liquid preparation (i.e., a substance that flows readily in its natural state) that contains a drug dissolved in a suitable solvent or mixture of mutually miscible solvents; the drug has been strengthened by the evaporation of its non-active parts.	C42898	SOLUTION, CONCENTRATE
C42987	solution, for slush	A solution for the preparation of an iced saline slush, which is administered by irrigation and used to induce regional hypothermia (in conditions such as certain open heart and kidney surgical procedures) by its direct application.	C42987	SOLUTION, FOR SLUSH
C60994	solution, gel forming / drops	A solution, which after usually being administered in a drop-wise fashion, forms a gel.	C60994	SOLUTION, GEL FORMING / DROPS
C42935	solution, gel forming, extended release	A solution that forms a gel when it comes in contact with ocular fluid, and which allows at least a reduction in dosing frequency	C42935	SOLUTION, GEL FORMING, EXTENDED RELEASE
C60992	solution/ drops	A solution which is usually administered in a drop-wise fashion.	C60992	SOLUTION/ DROPS
341	solvent for parenteral use	Solvent complying with requirements for parenteral use.	C43002	UNASSIGNED

342	solvent for solution for infusion	Solvent used to dissolved substances to produce a solution for infusion.	C43002	UNASSIGNED
343	solvent for solution for intraocular irrigation	Solvent used to dissolved substances to produce a solution for intraocular irrigation.	C43002	UNASSIGNED
C47912	sponge	A porous, interlacing, absorbent material that contains a drug. It is typically used for applying or introducing medication, or for cleansing. A sponge usually retains its shape.	C47912	SPONGE
344	spot-on	Spot-on preparations contain one or more active substances for the prevention and treatment of ectoparasitic and/or endoparasitic infestations of animals. They are applied in volumes which are usually less than 10 ml, to a small area on the head or back, as appropriate, of the animal.	C42986	SOLUTION
345	spot-on emulsion	Emulsion containing one or more active substances for the prevention and treatment of ectoparasitic and/or endoparasitic infestations of animals. They are applied in volumes which are usually less than 10 ml, to a small area on the head or back, as appropriate, of the animal.	C42913	EMULSION
346	spot-on solution	Solution containing one or more active substances for the prevention and treatment of ectoparasitic and/or endoparasitic infestations of animals. They are applied in volumes which are usually less than 10 ml, to a small area on the head or back, as appropriate, of the animal.	C42986	SOLUTION
347	spot-on suspension	Suspension containing one or more active substances for the prevention and treatment of ectoparasitic and/or endoparasitic infestations of animals. They are applied in volumes which are usually less than 10 ml, to a small area on the head or back, as appropriate, of the animal.	C42994	SUSPENSION
C42989	spray	A liquid minutely divided as by a jet of air or steam.	C42989	SPRAY
C42962	spray, metered	A non-pressurized dosage form consisting of valves which allow the dispensing of a specified quantity of spray upon each activation.	C42962	SPRAY, METERED
C42990	spray, suspension	A liquid preparation containing solid particles dispersed in a liquid vehicle and in the form of coarse droplets or as finely divided solids to be applied locally, most usually to the nasal-pharyngeal tract, or topically to the skin.	C42990	SPRAY, SUSPENSION
348	sterile concentrate	A sterile liquid preparation of increased strength and reduced volume which is usually diluted prior to administration.	C60891	CONCENTRATE
C42991	stick	A dosage form prepared in a relatively long and slender often cylindrical form.	C42991	STICK
349	stomach irrigation	Sterile, aqueous large volume preparations intended to be used for stomach irrigation.	C42947	IRRIGANT
C47914	strip	A long narrow piece of material.	C47914	STRIP
350	sublingual spray	Spray to be used under the tongue.	C42989	SPRAY
351	sublingual tablet	Solid, single-dose preparations to be applied under the tongue or to the buccal cavity, respectively, to obtain a systemic effect. They are prepared by compression of mixtures of powders or granulations into tablets with a shape suited for the intended use.	C42999	TABLET, ORALLY DISINTEGRATING
C42993	suppository	A solid body of various weights and shapes, adapted for introduction into the orifice of the human body; they usually melt, soften, or dissolve at body temperature.	C42993	SUPPOSITORY

C42924	suppository, extended release	A drug delivery system in the form of a suppository that allows for a reduction in dosing frequency.	C42924	SUPPOSITORY, EXTENDED RELEASE
C42994	suspension	A liquid dosage form that contains solid particles dispersed in a liquid vehicle. Note: A liquid is pourable; it flows and conforms to its container at room temperature. It displays Newtonian or pseudoplastic flow behavior.	C42994	SUSPENSION
352	suspension and effervescent granules for oral suspension	Effervescent granules to be dispersed in an appropriate liquid vehicle to produce a suspension for oral use.	C42909	GRANULE, EFFERVESCENT
353	suspension for infusion	Suspension suitable for infusion.	C42994	SUSPENSION
354	suspension for injection	Suspension suitable for injection.	C42994	SUSPENSION
C42925	suspension, extended release	A liquid preparation consisting of solid particles dispersed throughout a liquid phase in which the particles are not soluble; the suspension has been formulated in a manner to allow at least a reduction in dosing frequency as compared to that drug presented as a conventional dosage form (e.g., as a solution or a prompt drug-releasing, conventional solid dosage form).	C42925	SUSPENSION, EXTENDED RELEASE
C60995	suspension/ drops	A suspension which is usually administered in a dropwise fashion.	C60995	SUSPENSION/ DROPS
C47889	suture	A strand or fiber used to hold wound edges in apposition during healing.	C47889	SUTURE
C47898	swab	A small piece of relatively flat absorbent material that contains a drug. A swab may also be attached to one end of a small stick. A swab is typically used for applying medication or for cleansing.	C47898	SWAB
C42996	syrup	An oral solution containing high concentrations of sucrose or other sugars; the term has also been used to include any other liquid dosage form prepared in a sweet and viscid vehicle, including oral suspensions.	C42996	SYRUP
355	syrup extended release	Modified-release syrup showing a slower release of the active substance(s) than that of a conventional-release syrup administered by the same route.	C42925	SUSPENSION, EXTENDED RELEASE
C42998	tablet	A solid dosage form containing medicinal substances with or without suitable diluents.	C42998	TABLET
356	tablet and powder for oral solution	Tablet and powder to be diluted to produce liquid preparations intended for rectal use in order to obtain a systemic or local effect, or they may be intended for diagnostic purposes.	C61005	TABLET, DISPERSIBLE
357	tablet and solvent for rectal suspension	Tablet to be dispersed in its solvent to produce liquid preparations intended for rectal use in order to obtain a systemic or local effect, or they may be intended for diagnostic purposes.	C61005	TABLET, DISPERSIBLE
358	tablet for oral suspension	Tablet to be dispersed in water at the time of administration, to produce an oral suspension	C61005	TABLET, FOR SUSPENSION
359	tablet for rectal solution	Single-dose preparations which are dissolved in water at the time of administration, to produce rectal solution.	C61004	TABLET, FOR SOLUTION
360	tablet for rectal suspension	Single-dose preparations which are dispersed in water at the time of administration, to produce rectal suspension.	C61005	TABLET, FOR SUSPENSION
361	tablet for vaginal solution	Tablets intended for the preparation of vaginal solutions are single-dose preparations which are dissolved in water at the time of administration.	C61004	TABLET, FOR SOLUTION

C42893	tablet, chewable	A solid dosage form containing medicinal substances with or without suitable diluents that is intended to be chewed, producing a pleasant tasting residue in the oral cavity that is easily swallowed and does not leave a bitter or unpleasant after-taste.	C42893	TABLET, CHEWABLE
362	tablet, chewable/dispersible	Uncoated or film-coated tablets intended to be chewed or dispersed in water before administration giving a homogeneous dispersion.	C42893	TABLET, CHEWABLE
C42897	tablet, coated	A solid dosage form that contains medicinal substances with or without suitable diluents and is covered with a designated coating.	C42897	TABLET, COATED
C60997	tablet, coated particles	A solid dosage form containing a conglomerate of medicinal particles that have each been covered with a coating.	C60997	TABLET, COATED PARTICLES
C42905	tablet, delayed release	A solid dosage form which releases a drug (or drugs) at a time other than promptly after administration. Enteric-coated articles are delayed release dosage forms.	C42905	TABLET, DELAYED RELEASE
C42997	tablet, delayed release particles	A solid dosage form containing a conglomerate of medicinal particles that have been covered with a coating which releases a drug (or drugs) at a time other than promptly after administration. Enteric-coated articles are delayed release dosage forms.	C42997	TABLET, DELAYED RELEASE PARTICLES
C42910	tablet, effervescent	A solid dosage form containing mixtures of acids (e.g., citric acid, tartaric acid) and sodium bicarbonate, which release carbon dioxide when dissolved in water; it is intended to be dissolved or dispersed in water before administration.	C42910	TABLET, EFFERVESCENT
C42927	tablet, extended release	A solid dosage form containing a drug which allows at least a reduction in dosing frequency as compared to that drug presented in conventional dosage form.	C42927	TABLET, EXTENDED RELEASE
C42931	tablet, film coated	A solid dosage form that contains medicinal substances with or without suitable diluents and is coated with a thin layer of a water-insoluble or water-soluble polymer	C42931	TABLET, FILM COATED
C42930	tablet, film coated, extended release	A solid dosage form that contains medicinal substances with or without suitable diluents and is coated with a thin layer of a water-insoluble or water-soluble polymer; the tablet is formulated in such manner as to make the contained medicament available over an extended period of time following ingestion.	C42930	TABLET, FILM COATED, EXTENDED RELEASE
C61004	tablet, for solution	A tablet that forms a solution when placed in a liquid.	C61004	TABLET, FOR SOLUTION
C61005	tablet, for suspension	A tablet that prior to administration, is intended to be placed in liquid, where it forms a suspension. This pharmaceutical dosage form formerly was referred to as a Dispersible Tablet. The term Tablet, Dispersible is no longer used for approved drug products.	C61005	TABLET, FOR SUSPENSION
C42964	tablet, multilayer	A solid dosage form containing medicinal substances that have been compressed to form a multiple-layered tablet or a tablet-within-a-tablet, the inner tablet being the core and the outer portion being the shell.	C42964	TABLET, MULTILAYER

C42963	tablet, multilayer, extended release	A solid dosage form containing medicinal substances that have been compressed to form a multiple-layered tablet or a tablet-within-a-tablet, the inner tablet being the core and the outer portion being the shell, which, additionally, is covered in a designated coating; the tablet is formulated in such manner as to allow at least a reduction in dosing frequency as compared to that drug presented as a conventional dosage form.	C42963	TABLET, MULTILAYER, EXTENDED RELEASE
C42999	tablet, orally disintegrating	A solid dosage form, which disintegrates, dissolves or melts quickly (usually within a matter of seconds) on the tongue or mouth without the need of taking it with liquid. For those forms that disintegrate, the resulting particles may be plain, enteric coated or otherwise coated.	C42999	TABLET, ORALLY DISINTEGRATING
C61006	tablet, orally disintegrating, delayed release	A solid dosage form containing medicinal substances which disintegrates rapidly, usually within a matter of seconds, when placed upon the tongue, but which releases a drug (or drugs) at a time other than promptly after administration.	C61006	TABLET, ORALLY DISINTEGRATING, DELAYED RELEASE
C42985	tablet, soluble	A solid dosage form that contains medicinal substances with or without suitable diluents and possesses the ability to dissolve in fluids.	C42985	TABLET, SOLUBLE
C42992	tablet, sugar coated	A solid dosage form that contains medicinal substances with or without suitable diluents and is coated with a colored or an uncolored water-soluble sugar.	C42992	TABLET, SUGAR COATED
C47892	tampon	A plug made of cotton, sponge, or oakum variously used in surgery to plug the nose, vagina, etc., for the control of hemorrhage or the absorption of secretions.	C47892	TAMPON
C47897	tape	A narrow woven fabric, or a narrow extruded synthetic (such as plastic), usually with an adhesive on one or both sides.	C47897	TAPE
363	teat dip	One or more disinfectant active substances, usually in the form of solutions into which the teats of an animal are dipped pre- and, where necessary, post-milking to reduce the population of pathogenic micro-organisms on the surfaces.	C42986	SOLUTION
364	teat dip concentrate	Concentrate to be diluted to produce a teat dip.	C60891	CONCENTRATE
365	teat dip emulsion	Emulsion into which the teats of an animal are dipped pre- and, where necessary, post-milking to reduce the population of pathogenic micro-organisms on the surfaces.	C42913	EMULSION
366	teat dip solution	Solution into which the teats of an animal are dipped pre- and, where necessary, post-milking to reduce the population of pathogenic micro-organisms on the surfaces.	C42986	SOLUTION
367	teat dip suspension	Suspension into which the teats of an animal are dipped pre- and, where necessary, post-milking to reduce the population of pathogenic micro-organisms on the surfaces.	C42994	SUSPENSION
368	teat spray	One or more disinfectant active substances, usually in the form of solutions which are sprayed onto the teats of an animal pre- and, where necessary, post-milking to reduce the population of pathogenic micro-organisms on the surfaces.	C42989	SPRAY

369	teat spray solution	Solutions which are sprayed onto the teats of an animal pre- and, where necessary, post-milking to reduce the population of pathogenic micro-organisms on the surfaces.	C42989	SPRAY
370	teat stick	Stick to be inserted into the teat canal.	C42991	STICK
C43000	tincture	An alcoholic or hydroalcoholic solution prepared from vegetable materials or from chemical substances.	C43000	TINCTURE
371	toothpaste	Paste intended for application on teeth.	C42907	PASTE, DENTIFRICE
372	transdermal patch	Flexible pharmaceutical preparations of varying sizes, containing one or more active substances. They are intended to be applied to the unbroken skin in order to deliver the active substance(s) to the systemic circulation after passing through the skin barrier.	C42968	PATCH
373	transdermal system	Assembly of components intended for transdermal delivery driven by external forces (e.g. electric current chemical reaction ...). Transdermal patch is excluded.	C17423	DRUG DELIVERY SYSTEM
C43001	troche	A discoid-shaped solid containing the medicinal agent in a suitably flavored base; troches are placed in the mouth where they slowly dissolve, liberating the active ingredients.	C43001	TROCHE
374	urethral gel	Gel intended to be applied on urethral mucosis.	C42934	GEL
375	urethral stick	Solid preparations intended for local application on urethral mucosis.	C42991	STICK
376	vaginal capsule	Solid, single-dose preparations. They are generally similar to soft capsules, differing only in their shape and size. Vaginal capsules have various shapes, usually ovoid. They are smooth and have a uniform external appearance.	C25158	CAPSULE
377	vaginal capsule, hard	Hard capsule to be placed in the vagina.	C25158	CAPSULE
378	vaginal capsule, soft	Soft capsule to be placed in the vagina.	C25158	CAPSULE
379	vaginal cream	Cream to be applied to the vaginal mucosis.	C28944	CREAM
380	vaginal delivery system	Drug delivery system intended to be inserted in the vagina where it releases its contents over an extended period of time. Vaginal sponge and medicated vaginal tampon are excluded	C17423	DRUG DELIVERY SYSTEM
381	vaginal device	Liquid, semi-solid or solid preparations intended for administration to the vagina usually in order to obtain a local effect.	C17423	DRUG DELIVERY SYSTEM
382	vaginal emulsion	Liquid preparations in the form of an emulsion, intended for a local effect, for irrigation or for diagnostic purposes.	C42913	EMULSION
383	vaginal foam	Foam to be applied to the vagina	C42888	AEROSOL, FOAM
384	vaginal gel	Gel to be applied to the vaginal mucosis	C42934	GEL
385	vaginal liquid	Liquide to be injected in the vagina	C42953	LIQUID
386	vaginal ointment	Ointment to be applied to the vaginal mucosis	C42966	OINTMENT
387	vaginal solution	Solution to be injected in the vagina, for a local effect, for irrigation or for diagnostic purposes.	C42986	SOLUTION
388	vaginal sponge	Replaced by medicated sponge. Any specific route of administration is to be indicated through a combined term.	C47912	SPONGE
389	vaginal suspension	Suspension to be applied to the vagina, for a local effect, for irrigation or for diagnostic purposes.	C42994	SUSPENSION
390	vaginal tablet	Compressed tablets meant for insertion into vaginal cavity and designed to undergo slow dissolution and drug release in the cavity.	C42998	TABLET
C43003	wafer	A thin slice of material containing a medicinal agent.	C43003	WAFER

391	wound stick	Solid preparations intended for local application on wounds.	C42991	STICK

LIST OF ADMINISTRATORS GL42 B.2.4.

VICH CODE	VICH TERM	VICH DEFINITION
C82470	VETERINARIAN	Individuals qualified to practice veterinary medicine.
C82468	ANIMAL OWNER	The owner of the animal or an agent acting on the behalf of the owner.
C25741	PHYSICIAN	Individuals qualified to practice medicine.
C16960	PATIENT	The individual(s) (animal or human) exposed to the VMP
C53289	OTHER HEALTH CARE PROFESSIONAL	Health care professional other than specified in list.
C82491	MULTIPLE ADMINSTRATORS	More than one person was involved in the administration of the product.
C17649	OTHER	The actual value is not an element in the value domain of a variable (e.g., concept not provided by required code system).
C17998	UNKNOWN	Not known, not observed, not recorded, or refused

LENGTH OF TIME BETWEEN EXPOSURE TO VMP(S) AND ONSET OF AE GL42 B.3.4.

VICH CODE	VICH TERM	VICH DEFINITION
C82449	<2 minutes	The length of time between the exposure to the Veterinary Medicinal Product and the onset of the adverse event is less than 2 minutes.
C82443	<1 hour	The length of time between the exposure to the Veterinary Medicinal Product and the onset of the adverse event is at least 2 minutes and less than 1 hour.
C82440	<12 hours	The length of time between the exposure to the Veterinary Medicinal Product and the onset of the adverse event is at least 1 hour and less than 12 hour.
C84447	<24 hours	The length of time between the exposure to the Veterinary Medicinal Product and the onset of the adverse event is at least 12 hour and less than 24 hour.
C84450	<48 hours	The length of time between the exposure to the Veterinary Medicinal Product and the onset of the adverse event is at least 24 hour and less than 48 hour.
C82446	<3 days	The length of time between the exposure to the Veterinary Medicinal Product and the onset of the adverse event is at least 48 hour and less than 3 days.
C84485	<7 days	The length of time between the exposure to the Veterinary Medicinal Product and the onset of the adverse event is at least 3 days and less than 7 days.
C82448	<14 days	The length of time between the exposure to the Veterinary Medicinal Product and the onset of the adverse event is at least 7 days and less than 14 days.
C82442	<30 days	The length of time between the exposure to the Veterinary Medicinal Product and the onset of the adverse event is at least 14 days and less than 30 days.
C82445	>30 days and <6 months	The length of time between the exposure to the Veterinary Medicinal Product and the onset of the adverse event is at least 30 days but less than 6 months.
C82447	>6 months and <12 months	The length of time between the exposure to the Veterinary Medicinal Product and the onset of the adverse event is at least than 6 months but less than 12 months.
C82439	>12 months	The length of time between the exposure to the Veterinary Medicinal Product and the onset of the adverse event is 12 months or more.
C17998	UNKNOWN	Not known, not observed, not recorded, or refused

ATTENDING VETERINARIAN'S ASSESSMENT CATEGORIES VOCABULARY GL42 B.5.1

VICH CODE	VICH TERM	VICH DEFINITION
C54154	Probable	Causality as defined by VICH GL42 Data Elements for Submission of Adverse Event Reports
C82490	Possible	Causality as defined by VICH GL42 Data Elements for Submission of Adverse Event Reports
C53257	Unlikely	Causality as defined by VICH GL42 Data Elements for Submission of Adverse Event Reports
C17998	Unknown	Causality as defined by VICH GL42 Data Elements for Submission of Adverse Event Reports
C82477	No Assessment	The attending veterinarian did not provide an assessment.
C82478	No Attending Veterinarian	There was no attending veterinarian for this adverse event.

Attached Document Types - GL42 B.7.1.1		
VICH Codes	DOCUMENT TYPE	DEFINITION
C41198	Investigation	The act or process of a systematic and thorough examination; research, study; the process of inquiring into or following up, intended to develop facts.
C17649	Other	The actual value is not an element in the value domain of a variable (e.g., concept not provided by required code system).
C15311	QA Report	The operational techniques and activities undertaken within the quality assurance system to verify that the requirements for quality of the trial related activities have been fulfilled
C41203	Product Label	Any display of a written, printed, or graphic matter upon the immediate container of any substance or device to identify something and to indicate the nature, ownership, contents and other characteristic particulars of the object. FDA and the Supreme Cour
C36292	Laboratory Report	The outcome of a laboratory test.
C54273	Photograph	A visual representation of an object, scene, person or abstraction.
C68623	Necropsy (Autopsy) report	A postmortem examination of the body that includes an examination of the internal organs and structures after dissection to determine the cause of death and the nature of pathological changes.
C28277	Histopathology report	The description of cells and tissues made by a pathologist based on microscopic evidence, and sometimes used to make a diagnosis of a disease.
C54694	Labeling Materials	All written, printed, or graphic matter accompanying an article at any time while such article is in interstate commerce or held for sale after shipment or delivery in interstate commerce.
C79588	Promotional Materials	Definition awaited (NCI)
C16491	Cytology report	The light microscopic study of normal and abnormal cells in fine needle aspirates (FNAs), body cavity fluids, and smears.
C60727	Radiographs	An image produced on a radiosensitive surface by x-ray radiation that has penetrated and passed through a structure.
C17999	Magnetic Resonance Imaging	Pictures of structures inside the body. MRI scans use a large magnet connected to a computer to create pictures of areas inside the body.
C17999	Computer Tomography	Pictures of structures inside the body. In CT scanning, an x-ray machine linked to a computer is used to produce detailed pictures of organs inside the body.

C45258	Medical Records	A chronological written account of a patient's examination and treatment that includes the patient's medical history and complaints, the physician's physical findings, the results of diagnostic tests and procedures, and medications and therapeutic procedures
C28455	Sonogram	Computer picture of areas inside the body created when sound waves bounce off organs and other tissues.
C37945	Echocardiogram	An image of the heart produced by ultrasonography.
C47902	Article	Nonfictional prose forming an independent part of a publication.
C68637	Certificate	A document earned by a person indicating that the person has specific knowledge, skills, or abilities in the view of a certifying body. Similarly, a document indicating that a product or process is suitable or in working order for a specific purpose.
C73537	Specification	A detailed description of criteria for a piece of work.
C25198	Record	Anything (e.g., a document) providing permanent evidence of or information about past events.
C25391	Analysis	Examination and interpretation; the process of identifying an issue to be understood and addressed, modelling the issue, investigating the model results, interpreting the results, and possibly making a recommendation. The concept also refers to the examin
C70805	Letter	A written message addressed to a person or organization.
TBD	Multiple document types	There is more than one document type attached.

Dose Denominator Qualifiers B.2.1.7.1.2.1

VICH Code	VICH TERM	VICH DEFINITION
TBD	Animal	Any member of the kingdom Animalia.
TBD	Enclosure	Any area to which the animal(s) is (are) confined. Enclosures include pens, tanks, corrals, fields, cages, and ponds.
TBD	Teat	The protuberance on the udder in female animals.
TBD	Quarter	One quarter of the udder of a cow.

Accuracy of number of animals B.3.2.1.1.1

VICH Code	VICH TERM	VICH DEFINITION
TBD	Actual	The value is the actual number of animals
C25498	Estimated	The value is an approximation of the number of animals

ANNEX B - GL 30 – CONTROLLED LISTS OF TERMS MAINTENANCE

WORKSHARING – LEAD REGIONS

	LIST	GL 42 REFERENCE	LEAD REGION
a.	Reporter Categories	A.3.1.1 and A.3.2.1	USA (FDA/CVM)
b.	RA (Regulatory Authorities) Identifier Codes	A.4.1	USA (FDA/CVM)
